How to Let Customers Copy a Wishlist

Pro Features · https://wpfactory.com/docs/duplicate-copy-wishlist/

To let customers copy a wishlist in Wishlist for WooCommerce Pro, go to WPFactory > Wishlist, open the Wishlist Page tab, enable Duplicate Functionality in the Duplicate section, and save. Logged-in customers then see a COPY button on the wishlist page that duplicates the current list into a new one they can rename.

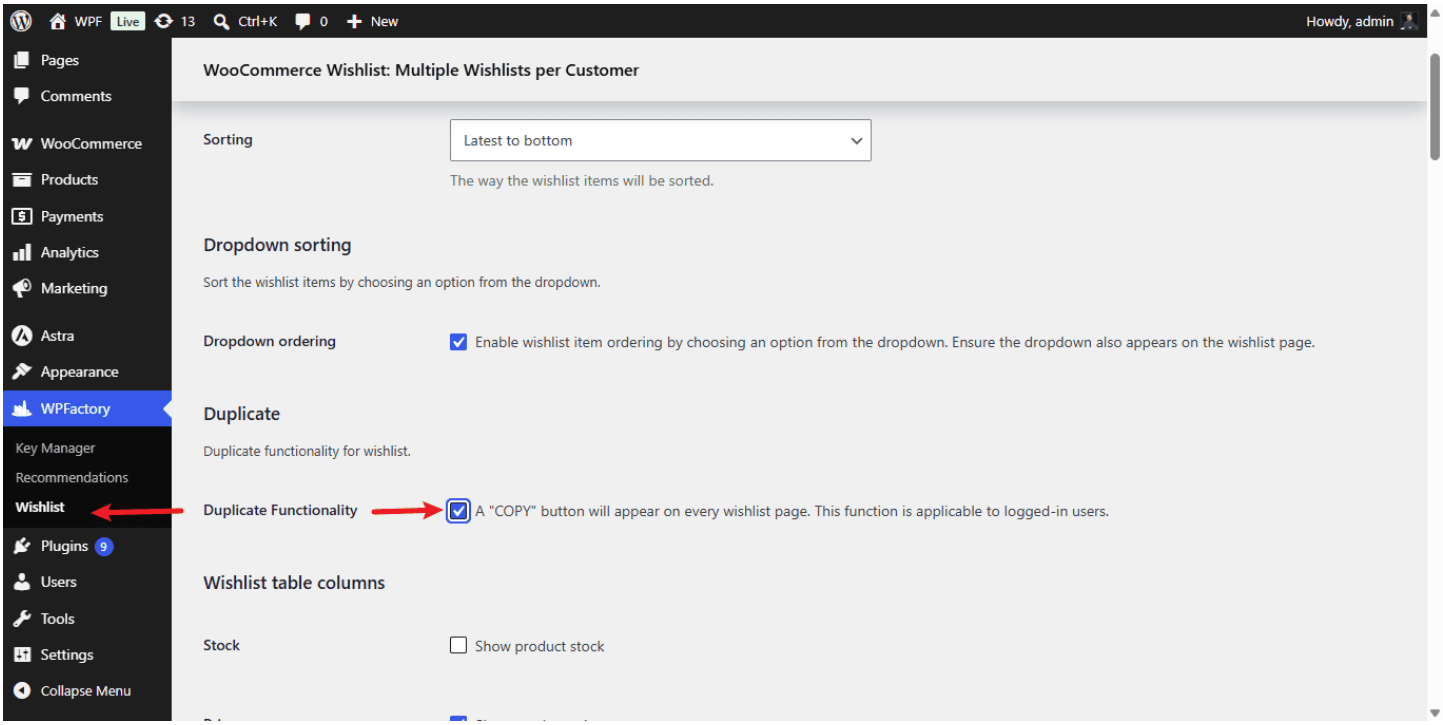
Before you start

- WooCommerce, active.
- Wishlist for WooCommerce Pro.
- The copy button appears for logged-in users only.

Step-by-step setup

1. Go to **WPFactory > Wishlist** (also reachable at **WooCommerce > Settings > Wishlist**).
2. Open the **Wishlist Page** tab and scroll to the **Duplicate** section.
3. Enable **Duplicate Functionality** (`alg_wc_wl_duplicate_option`, default **No**).
4. Save changes.

A **COPY** button now appears on every wishlist page. When a customer clicks it, the current wishlist is duplicated into a new list they can rename.



WISHLIST FOR WOOCOMMERCE

This is a Pro feature of Wishlist for WooCommerce. If you are still on the free version, upgrading unlocks the copy button along with sorting and the rest of the Pro toolkit.
