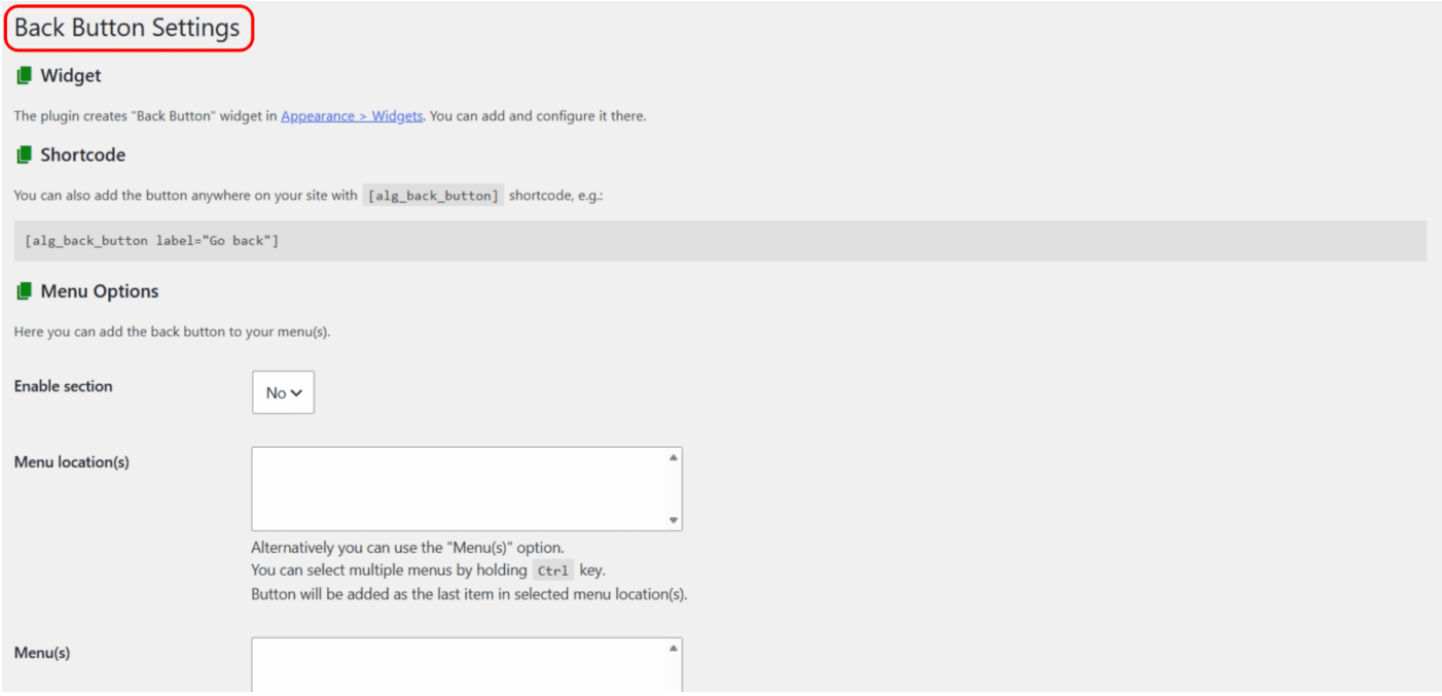
Back Button Widget Settings Reference

References · https://wpfactory.com/docs/back-button-widget-settings-reference/

This page maps the entire settings screen of Back Button Anywhere Widget for WordPress, section by section, with the option ID behind each field. All settings live at **WPFactory > Back Button** (the page is titled "Back Button Settings") and are stored together in the `alg_back_button` option.



Widget

An informational section. It points you to **Appearance > Widgets**, where the **Back Button** widget is added. The widget's own fields (label, class, style, type, and so on) are set there, not on this screen.

Shortcode

An informational section showing the `[alg_back_button]` shortcode and an example. See the shortcode attributes reference for the full list.

Menu Options (Pro)

Label	Option ID	Default	Free/Pro
