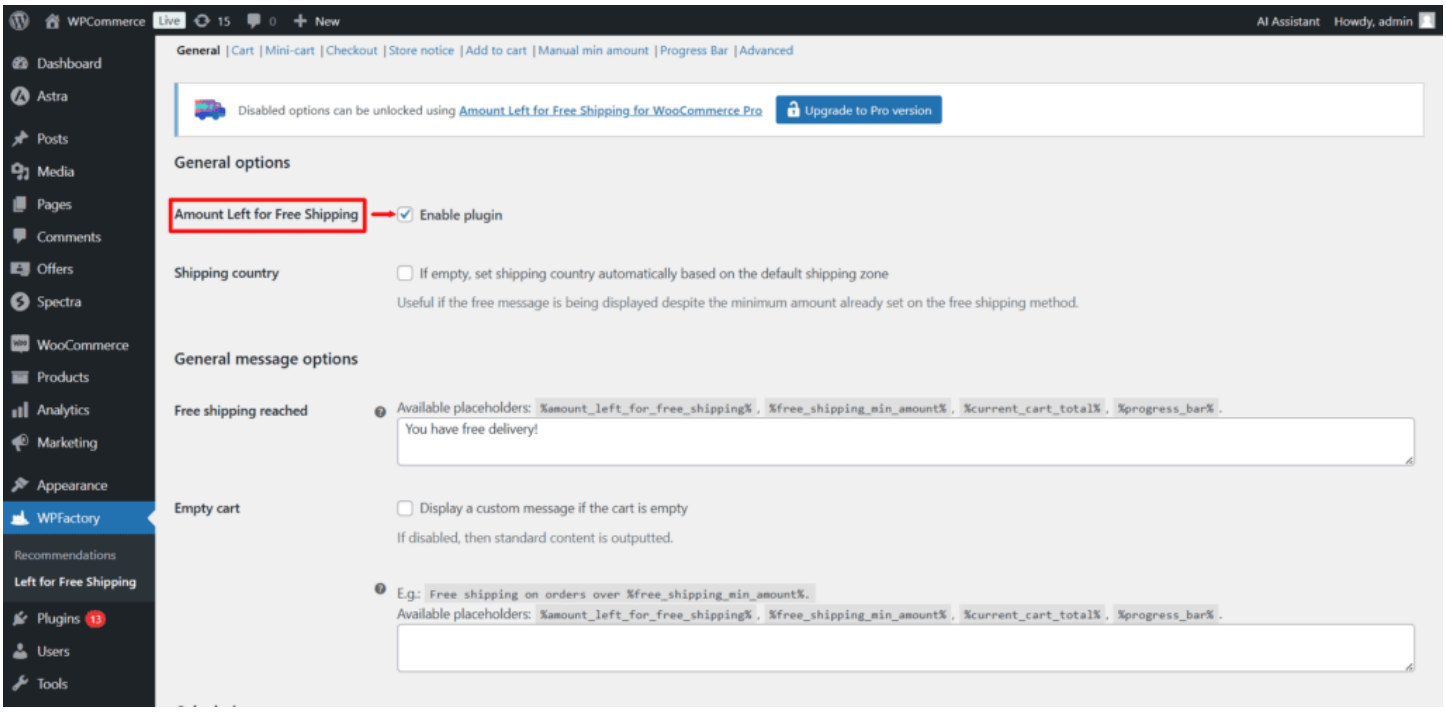
General and Cart Options for the WooCommerce Free Shipping Bar

Pro Features · https://wpfactory.com/docs/cart-settings/

The General and Cart sections of the Free Shipping Bar: Amount Left for Free Shipping for WooCommerce control how the amount left for free shipping is calculated and where it appears on the cart page. Most of these options are free, with a few Pro extras noted below.

Go to **WPFactory > Left for Free Shipping** (also reachable at **WooCommerce > Settings > Amount Left for Free Shipping**).



General options

Label	Option ID	Default	Free/Pro

Amount Left for Free Shipping (Enable plugin)	`alg_wc_left_to_free_shipping_enabled`	Yes	Free
Shipping country (set automatically if empty)	`alg_wc_left_to_free_shipping_set_shipping_country_automatically`	No	Free

Calculation

These options decide which cart figure the plugin treats as the total when working out how much is left.

Label	Option ID	Default
Cart total method (Displayed subtotal, Cart contents total, Cart total)	`alg_wc_left_to_free_shipping_cart_total_method`	Displayed subtotal
Exclude discounts from cart total	`alg_wc_left_to_free_shipping_include_discounts`	Yes (excluded)
Exclude shipping from cart total	`alg_wc_left_to_free_shipping_exclude_shipping`	No
Also exclude shipping taxes	`alg_wc_left_to_free_shipping_exclude_shipping_taxes`	Yes

Hide shipping methods and hide the amount left text

The General section also lets you hide other shipping methods once free shipping is available, and hide the message in specific cases. Note the exact option names, which are commonly mislabeled:

- There is no "Free shipping method" selector. The option is **Visible shipping methods** (`alg_wc_left_to_free_shipping_visible_shipping_methods_on_hide`), a multiselect of the methods that

stay visible once free shipping is reached, used together with **Hide shipping methods** (`alg_wc_left_to_free_shipping_hide_shipping_methods`).

- **Hide the amount left text** can be triggered by cart amount (`alg_wc_left_to_free_shipping_min_cart_amount`, free), by disabled shipping method (`alg_wc_left_to_free_shipping_hide_by_disabled_shipping_method`, free), by category (`alg_wc_left_to_free_hide_by_category`, Pro), and by user role (`alg_wc_left_to_free_shipping_hide_by_user_role`, Pro).

Cart section

Enable the Cart section to show the message on the cart page. In the free version you get the enable toggle, content, position, and priority. Custom style is a Pro extra.

Label	Option ID	Default	Fre
Enable section	`alg_wc_left_to_free_shipping_info_enabled_cart`	No	Fre
Content	`alg_wc_left_to_free_shipping_info_content_cart`	%amount_left_for_free_shipping% left for free shipping	Fre
Position	`alg_wc_left_to_free_shipping_info_position_cart`	After cart totals	Fre
Position order (priority)	`alg_wc_left_to_free_shipping_info_priority_cart`	10	Fre
Custom style (text color, font size)	`alg_wc_left_to_free_shipping_cart_custom_style_enabled`	No	Pro

For in-table positions, the **Wrap method** (`alg_wc_left_to_free_shipping_cart_wrap_method`, default Ignore) and **Wrap template** (`alg_wc_left_to_free_shipping_cart_wrap_template`) add the row markup.

Both are free.

AMOUNT LEFT FOR FREE SHIPPING

The calculation, cart display, and hide rules are free. Amount Left for Free Shipping Pro adds custom styling, per-category and per-user-role hiding, and extra display sections.
