Wishlist Plugin Compatibility Features

How to · https://wpfactory.com/docs/compatibility-features/

The **Compatibility** tab of Wishlist for WooCommerce, under **WPFactory > Wishlist > Compatibility**, holds switches for specific themes and plugins: a The7 theme option that replaces TI WooCommerce Wishlist buttons with this plugin's button (free), and a Wishlist column for WBW Product Table (Pro). Tick the one that matches your setup and save.

Accessing compatibility settings

Go to **WPFactory > Wishlist** (also reachable at **WooCommerce > Settings > Wishlist**) and open the **Compatibility** tab. Each section names the theme or plugin it applies to.

Options on the Compatibility tab

Section	Label	Option ID	Default	Free/Pro
The7 (theme)	TI WooCommerce Wishlist: Replace TI Wishlist shortcode by ours	`alg_wc_wl_the7_ti_wishlist_replace_shortcode`	No	Free
WBW Product Table (plugin)	Wishlist column: Add a Wishlist column to the product table	`alg_wc_wl_wbw_product_table_wishlist_col`	No	Pro

The7 theme compatibility

The7 has built-in support for TI WooCommerce Wishlist and outputs its `[ti_wishlists_addtowishlist]` shortcode. With **Replace TI Wishlist shortcode by ours** ticked, that shortcode shows this plugin's add/remove button instead, so The7 layouts keep a working wishlist button after you switch plugins, without editing templates. More detail: integrate the wishlist with The7.

WBW Product Table

If you list products with the WBW Product Table plugin, **Wishlist column** (Pro) adds a column with the wishlist button to those tables.

Other compatibility settings elsewhere

- **Block product grids: Buttons > Thumb button - Loop > Gutenberg compatibility** adds the thumb button to the "Products by Category" block.
- **Cache plugins: General > Cache** loads wishlist elements by JavaScript. See wishlist and cache plugins.
- **AJAX filters and infinite scroll: Advanced > Javascript update events** (Pro) re-scans products loaded by other plugins. See refresh the wishlist with JavaScript events.
- **Multilingual stores:** see wishlist issues with WPML.

Saving your adjustments

After adjusting the settings, click **Save changes** so all modifications are applied, then clear any page cache.

If it does not work

- **The7 still shows the TI button:** the option only takes effect on the front end; clear the cache and reload. If the TI plugin itself is still active, deactivate it.
- **No Wishlist column in WBW Product Table:** the option is Pro; after enabling it, check the table's column settings in WBW Product Table.

FAQ

Do I need the Compatibility tab if I do not use The7 or WBW Product Table?

No. Leave both options off.

Which options here are free?

The The7 / TI WooCommerce Wishlist replacement is free. The WBW Product Table column is Pro.

Will my old TI wishlist items move over?

No. The option replaces the button only; it does not import saved lists.
