How to Export User Sales Data to CSV

How to · https://wpfactory.com/docs/admin-options-editable/

Exporting customer sales data

Maximum Products per User for WooCommerce can export the sales figures it calculates for every customer to a CSV file, so you can audit limits or analyze buying behavior outside WordPress. This feature is free and lives in the Admin section.

Where to find it

Go to **WPFactory > Max Products per User** (also reachable at **WooCommerce > Settings > Maximum Products per User**), then open the **Admin** section and scroll to **User sales data export options**.

Export options

Label	Option ID	Default
Column separator	`alg_wc_mppu_user_export_sep`	,
Merge user (one line per user)	`alg_wc_mppu_user_export_merge_user`	No
Data separator (within a merged line)	`alg_wc_mppu_user_export_data_sep`	;
Extra meta (comma-separated meta keys)	`alg_wc_mppu_user_export_meta`	Empty

Step by step

1. Set your **Column separator** (use a semicolon or tab if your spreadsheet expects it).
2. To get one row per customer, enable **Merge user**, then set the **Data separator** and any **Extra meta** keys you want included.
3. Save the settings.
4. Click **Export sales data for all users** at the top of the export options. The CSV downloads immediately.

> **Tip:** the export reflects the data the plugin has calculated. On a new install, run **Tools > Recalculate sales data** first so past orders are included.

Related

To view and edit a single customer's figures, enable **User's sales data** in the Admin section and open that user's profile page.

MAXIMUM PRODUCTS PER USER FOR WOOCOMMERCE

Sales-data export is free in Maximum Products per User for WooCommerce. Pro adds per-product and per-category limits to act on what the data reveals.
