How to customize your Wishlist Layout

How to · https://wpfactory.com/docs/customize-wishlist-layout/

To customize the wishlist layout in WooCommerce, use Wishlist for WooCommerce in three places under **WPFactory > Wishlist**: **Wishlist Page** chooses the table columns, **General > Responsiveness** sets when the mobile layout starts, and **Style > Wishlist page table** controls column titles and mobile alignment. All three are free.

1. Choose what the table shows

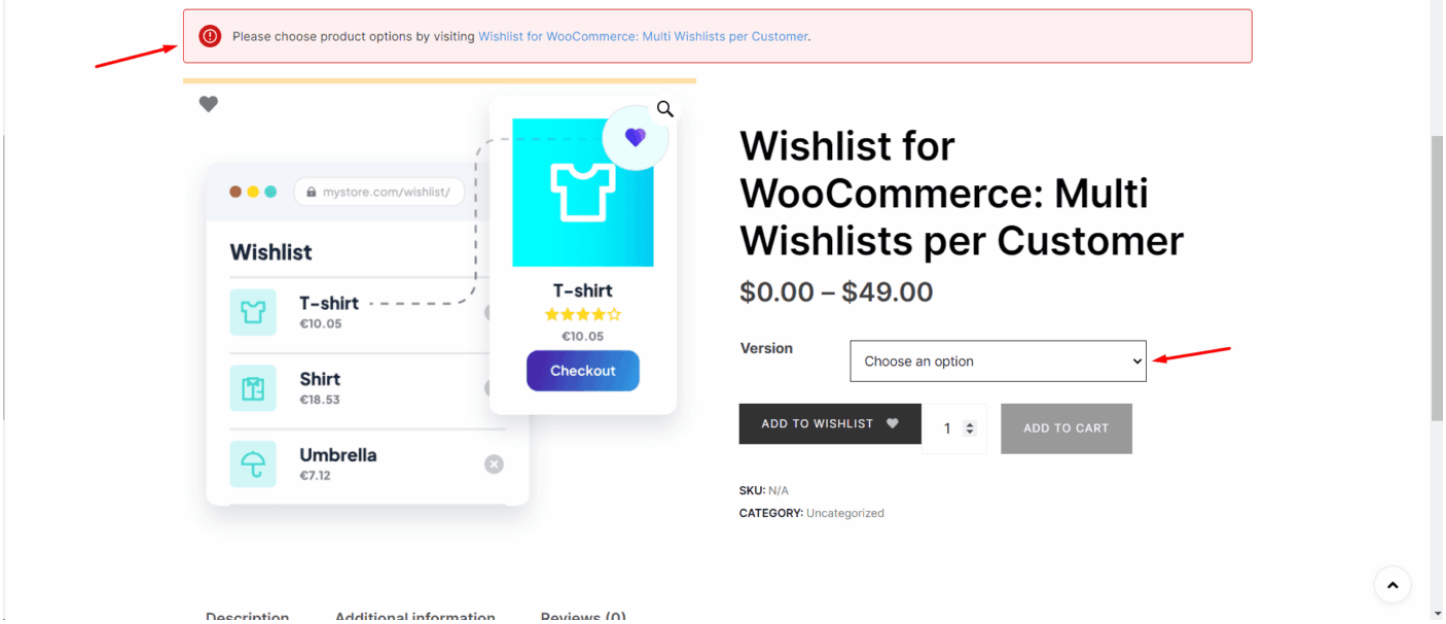
Go to **WPFactory > Wishlist** (also reachable at **WooCommerce > Settings > Wishlist**) and open **Wishlist Page**. Under **Wishlist table columns**, tick the columns you want: Stock, Price, Add to cart button, SKU, Description, Attributes, Subtotal, Categories and Taxonomies (Quantity is Pro). The full list with defaults is in setting up the wishlist page.

2. Set the mobile breakpoint

On the **General** tab, the **Responsiveness** section sets breakpoints that will be used to adapt the layout to mobile. When the browser window is below them, the plugin switches the wishlist to its responsive layout.

Label	Option ID	Default	What it does
Max width	`alg_wc_wl_responsiveness_max_width`	768	Window width in pixels below which the mobile layout applies.
Max height	`alg_wc_wl_responsiveness_max_height`	400	Window height in pixels below which the mobile layout applies.

Label	Option ID	Default	What it does
Evaluation method	`alg_wc_wl_responsiveness_evaluation_method`	Max width or max height	Whether either limit is enough, or both must be met (Max width and max height).



3. Style the table

On the **Style** tab, tick **Custom style**, then use **Wishlist page table**:

Label	Option ID	Default
Column title (desktop)	`alg_wc_wl_style_wish_list_t_titles_desktop`	Yes
Column titles (mobile)	`alg_wc_wl_style_wish_list_t_titles_mobile`	Yes
Alignment (on mobile)	`alg_wc_wl_style_wish_list_t_alignment_mobile`	Default (also Left, Right, Center)

The same tab styles the remove icon (**Wishlist page remove item button**), the buttons and the popup. For anything else, **Style customization > Add customized css** accepts your own CSS.

Other layout options

- **General options:** the **General** tab also turns on multiple wishlists (shown as tabs above the table) and the Cache option that loads the table after the page for cached sites.
- **Icons:** the Font Awesome library that draws the wishlist icons is loaded from **General > Font Awesome**.
- **Order of items: Wishlist Page > Sorting** (Latest to bottom, Alphabetical ASC or DESC) is free; dropdown, drag-and-drop and arrow sorting are Pro.
- **Your own page design:** place `[alg_wc_wl]` on any page, for example one built with Elementor. See create a wishlist page with Elementor.

Saving your changes

After you have made your changes, click **Save changes** on each tab to apply them to your site, then clear any page cache.

If it does not work

- **Style changes do nothing: Custom style** is not ticked.
- **Mobile layout shows on a laptop:** with **Max width or max height**, a short browser window below 400 px also counts as mobile. Lower **Max height** or switch to **Max width and max height** .
- **A column you ticked is missing:** some columns depend on others; the Note field, for example, needs the Attributes column. See note fields on the wishlist page.

FAQ

Can I hide the column titles only on phones?

Yes. Untick **Show column titles on mobile version** and keep the desktop option ticked.

Is layout customization free?

Yes. Columns, responsiveness and table styling are free; the Quantity column and extra sorting methods are Pro.
