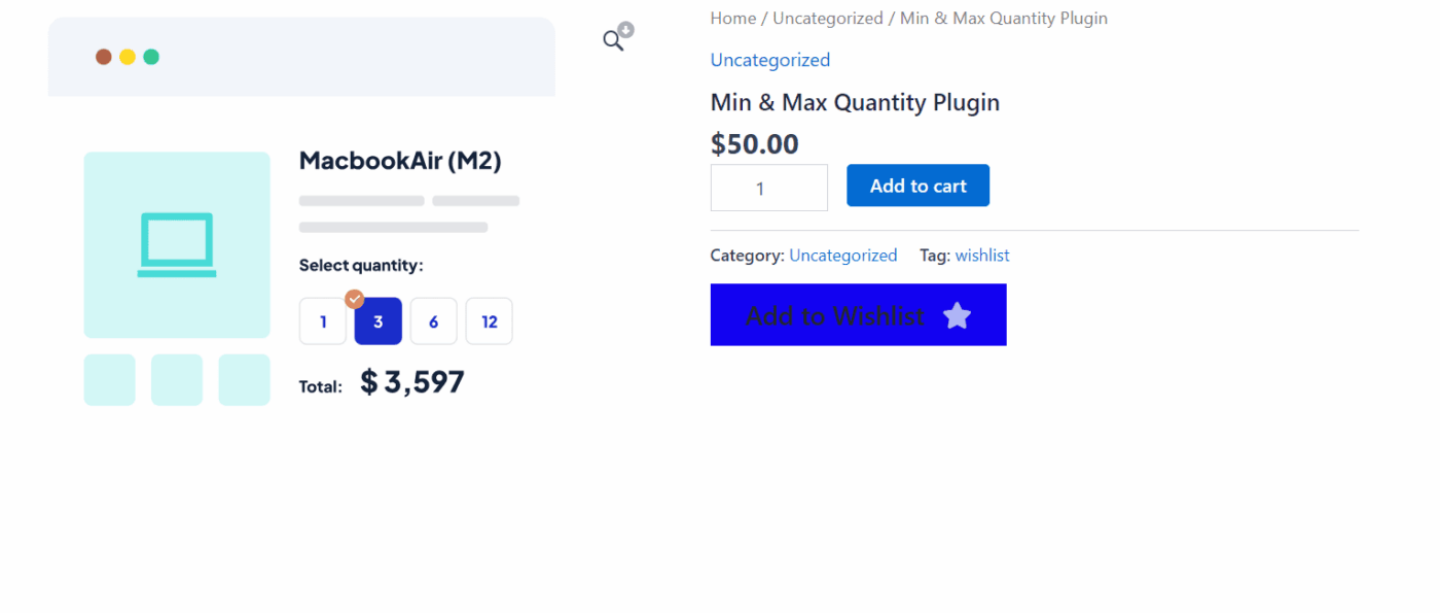
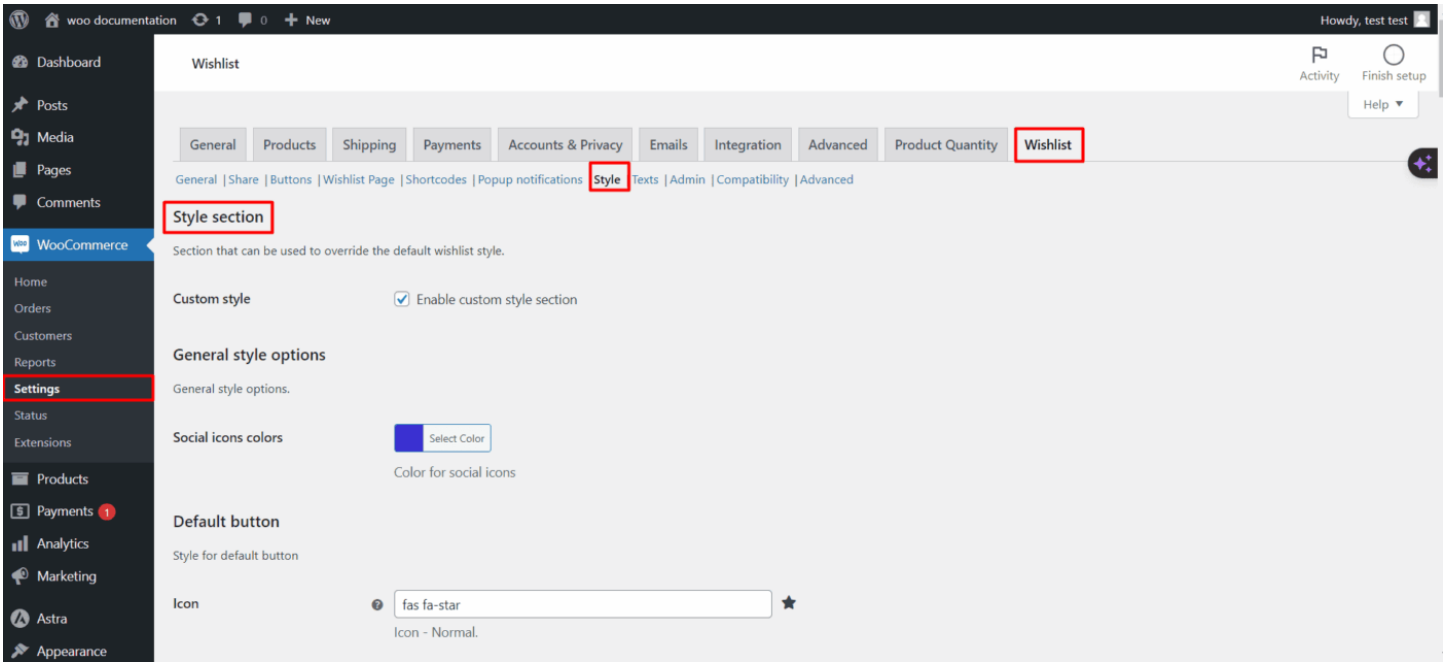
How to style wishlist options

How to · https://wpfactory.com/docs/customize-wishlist-style/

To style the wishlist buttons, popup and page in WooCommerce, go to **WPFactory > Wishlist > Style** in Wishlist for WooCommerce and tick **Custom style** (Enable custom style section). That unlocks colors, icons, sizes, alignment and padding for every wishlist element, plus a box for your own CSS. The Style tab is free.





Step 1: Enable custom styles

Go to **WPFactory > Wishlist** (also reachable at **WooCommerce > Settings > Wishlist**), open **Style**, and tick **Custom style**. It is off by default, and none of the settings below apply until it is on.

Step 2: Work through the sections

Section	What you can set	Key defaults
General style options	Social icons colors and hover colors	`#a0a0a0`
Default button	Icon - Normal / Added, background and hover colors, text color (text and icon), font weight, border radius, font size, margin and alignment for single product and loop	Icon `fas fa-star`, background `#919191`, font size 15, alignment Left (single) / Center (loop)
Thumb button	Icons, pulsate on hover, icon colors (normal, added, hover), position over the image, hover size, offset, padding, font size	Position Top left, hover size 145%, font size 25 (single) / 20 (loop)

Section	What you can set	Key defaults
Thumb button - Back layer	A circle behind the thumb icon: enable, background color, size	Off, `#ffffff`, 28 px
Popup notifications	Add and remove icons, progress bar, colors, timeout, position	Black background, 7000 ms, Center
Wishlist page table	Column titles on desktop and mobile, alignment on mobile	Titles shown
Wishlist page remove item button	Icon, color, size, hover size	`fas fa-times-circle`, `#DC3232`
My account tab	Show an icon on the tab	Off, `f004`
Multiple wishlist - Modal color / Tab color	Popup and tab colors when multiple wishlists are on	White popup, grey tabs
Style customization	Add customized css	Empty

Step 3: Personalize buttons and icons

Pick icons for the "not added" and "added" states, set their colors, and turn on **Pulsate** (Make the icon pulsate on mouse over) for a livelier thumb button. Details: wishlist icon color and thumb icon.

Step 4: Adjust alignment, padding and responsive details

Margins and padding use CSS shorthand (for example `0 0 15px 0`). Single product and loop values are separate, so you can keep the product page roomy and shop tiles compact. Which layout counts as mobile is set in **General > Responsiveness**.

Step 5: Save your changes

Click **Save changes** and clear any cache or CSS optimization so the new styles load.

If it does not work

- **Nothing changes: Custom style** is not ticked.
- **The theme overrides a value:** add a stronger rule in **Add customized css**.
- **Icons show as squares:** keep **General > Font Awesome > Load FontAwesome** ticked.

FAQ

Is styling a Pro feature?

No. The whole Style tab is free.

Can I go back to the default look?

Yes. Untick **Custom style**; the plugin returns to its built-in styling while keeping your saved values.
