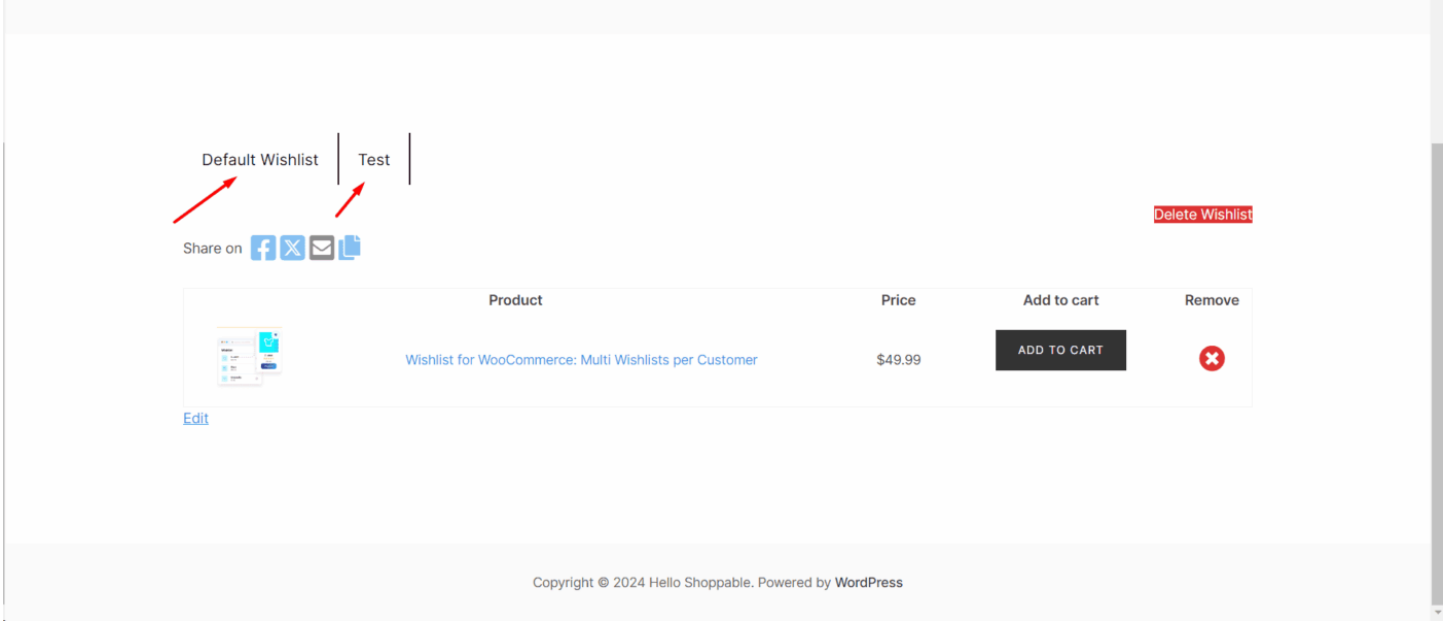
How to Enable Multiple Wishlists in WooCommerce

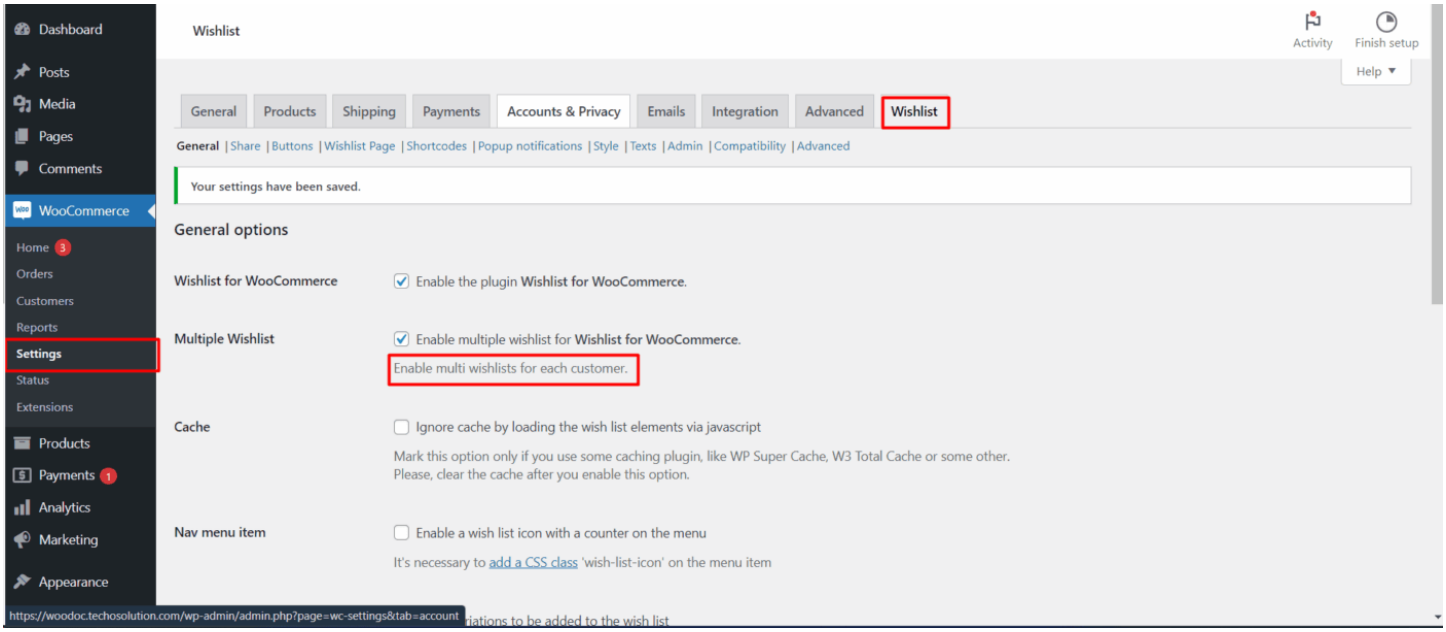
How to · https://wpfactory.com/docs/enable-multiple-wishlists/

To enable multiple wishlists in WooCommerce, go to **WPFactory > Wishlist > General** in Wishlist for WooCommerce and tick **Multiple Wishlist**. Each customer can then create named lists, for example one for a birthday and one for the holidays, and choose which list a product goes into. The option is free and off by default.



Step-by-step setup

1. Go to **WPFactory > Wishlist** (also reachable at **WooCommerce > Settings > Wishlist**).
2. Open the **General** tab.
3. In the **General options** section, find **Multiple Wishlist** (`alg_wc_wl_multiple_wishlist_enabled`, default **No**).
4. Tick **Enable multiple wishlist for Wishlist for WooCommerce**.
5. Save changes.



What customers can do

- **Choose a list when saving:** clicking the wishlist button on a product opens a **Select Wishlist** popup listing their wishlists, with a **Done** button to confirm.
- **Create and name lists: Create Wishlist** in the same popup asks for a **Wishlist Name**.
- **Browse lists as tabs:** the wishlist page shows one tab per list, starting with the default list.
- **Add, remove and move products** between lists.
- **Delete wishlists** that are no longer needed.

Texts and styling

- On the **Texts** tab, the **Multiple Wishlist** section sets the **Saved to wishlist** message (default "Wishlist successfully saved.") and the name of the **Default Wishlist** tab.
- On the **Style** tab, **Multiple wishlist - Modal color option** styles the popup and **Multiple wishlist - Tab color** styles the tabs. Both need **Custom style** ticked.

How it works with other features

- The menu icon and `[alg_wc_wl_counter]` count each product once, even if it sits in several lists.
- **Auto remove items > When added to cart** removes the product from every list that holds it. See remove wishlist items automatically.

- In Pro, **Duplicate Functionality** adds a COPY button so logged-in customers can copy a list. See let customers copy a wishlist.

If it does not work

- **No popup when clicking the button:** check the browser console for JavaScript errors and clear any page cache.
- **Popup or tab colors do not change:** tick **Style > Custom style**.
- **Lists do not save:** see multiple wishlists not working.

FAQ

Is Multiple Wishlist a Pro feature?

No. The option is free; Pro adds copying a wishlist and the sorting tools.

What happens to existing wishlists when I turn it on?

Products customers already saved stay in their default list, shown as the first tab.

Can I rename the default list?

Yes, with **Texts > Multiple Wishlist > Default Wishlist**.
