Troubleshooting the Free Shipping Amount Label & Progress Bar

Troubleshooting · https://wpfactory.com/docs/fix-free-shipping-display/

If the Free Shipping Amount Label & Progress Bar for WooCommerce plugin is not working, first confirm it is activated under Plugins, then clear your browser cache and any caching plugins. Next, check compatibility with your WooCommerce version, temporarily deactivate other plugins to find a conflict, and note any error messages on the frontend or in admin.

However, if you encounter issues, here are some troubleshooting steps you can follow

General Troubleshooting

- **Check Plugin Activation:** Ensure the plugin is activated on your WordPress dashboard under **"Plugins."**
- **Clear Cache:** Clear your browser cache and any caching plugins you might be using. This ensures you're seeing the latest version of the plugin's functionality.
- **Compatibility:** Verify compatibility with your WooCommerce version and any other plugins you're using. Check the plugin documentation or developer website for known compatibility issues.
- **Deactivate Conflicting Plugins:** Deactivate other plugins temporarily to see if a conflict is causing the problem. If the issue disappears after deactivating a specific plugin, you'll have identified the culprit.
- **Error Messages:** Pay attention to any error messages displayed on your store's frontend or within the WordPress admin area. These messages can provide valuable clues about the source of the problem.

AMOUNT LEFT FOR FREE SHIPPING
