Free Shipping Bar: Developer Hooks and Filters Reference

Developers · https://wpfactory.com/docs/free-shipping-developer-hooks-filters/

This reference lists the PHP hooks, filters, and helper function exposed by the Free Shipping Bar: Amount Left for Free Shipping for WooCommerce. Names are taken directly from the plugin source (version 2.5.4). Add your snippets to a child theme `functions.php` or a small custom plugin.

Filters

Filter	Passed value	Purpose
`alg_wc_get_left_to_free_shipping`	string `$result`, array `$args`	The final message HTML before it is printed. Modify or wrap the output.
`alg_wc_get_left_to_free_shipping_args`	array `$args`	The argument array (content, location, template, and so on) before the message is built.

Filter	Passed value	Purpose
`alg_wc_get_left_to_free_shipping_validation`	bool `$validation`, array `$args`	Return false to hide the message for the current request. This is the hook the Pro category and user-role hiding uses.
`alg_wc_left_to_free_shipping_cart_total`	float `$total`	The cart total the plugin uses in its calculation. Adjust to include or exclude custom amounts.
`alg_wc_left_to_free_shipping_manual_min_amount`	array `$data`, array `$args`	The resolved manual minimum (`amount`, `is_available`). The WooCommerce Currency Switcher conversion hooks in here.
`alg_wc_left_to_free_shipping_manual_min_amount_available_types`	array `$id_array`, array `$args`	The list of matched extra-option keys (role, currency, zone, method, class) for the current cart.

Filter	Passed value	Purpose
`alg_wc_left_to_free_shipping_amount_types`	array `$types`	The extra-option types available for manual amounts (roles, currencies, zones, shipping_methods, shipping_classes).
`alg_wc_left_to_free_shipping_ajax_events`	string `$events`	Extra space-separated JavaScript events that trigger an AJAX refresh, added on top of the settings field.
`alg_wc_left_to_free_shipping_wide_notice_animation_time`	int `$ms` (default 300)	Animation duration in milliseconds for the site-wide store notice.

Actions

Action	Passed value	Purpose
`alg_wc_left_to_free_shipping_core_loaded`	object `$core`	Fires once the core class is ready. Useful for attaching your own front-end output. Note: this is also used as a filter internally.

Helper function

Output or retrieve the message anywhere in PHP:

```
echo alg_wc_get_left_to_free_shipping( array(
    'content'  => '%amount_left_for_free_shipping% left for free shipping',
    'location' => 'custom',
) );
```

Accepted keys include `content`, `template`, `multiply_by`, `min_free_shipping_amount`, `free_delivery_text`, `min_cart_amount`, and `location`.

Examples

Hide the message for a specific page:

```
add_filter( 'alg_wc_get_left_to_free_shipping_validation', function( $validation, $args ) {
    if ( is_front_page() ) {
        return false;
    }
    return $validation;
}, 10, 2 );
```

Add a custom refresh event:

```
add_filter( 'alg_wc_left_to_free_shipping_ajax_events', function( $events ) {
    return trim( $events . ' my_custom_event' );
} );
```

Shortcodes and widget

For the registered shortcodes, the widget, and the message placeholders, see the Free shipping shortcodes and widget and Free shipping message placeholders references.
