Customizing the Add to Cart Button by Product Type in WooCommerce

Pro Features · https://wpfactory.com/docs/all-product-types/

This guide pulls together the two broadest ways Change Add to Cart Button Text for WooCommerce changes your button text: the **All Products** section and the **Per Product Type & Condition** section. Both are free. Only the "On sale" condition inside the second section needs Pro.

1. All Products: one label everywhere

The All Products section sets a single button label across your whole catalog. Tick **Enable section**, fill in **Single product page** and **Shop page**, and save. Use shortcodes to make it dynamic, for example `Add [alg_wc_atcbl_product_title] to cart`. This is the baseline that more specific sections can override.

2. Per Product Type & Condition: label by type and state

This section targets the button text by product type and by product state:

- **Types:** Simple, Variable, External, Grouped and Other (a catch-all for any other type).

- **Conditions (free):** Already in cart, Empty price, Free product.
- **Condition (Pro):** On sale.

Each type and condition has separate **Single product page** and **Shop page** fields, and each shows the WooCommerce default underneath so you know what you are replacing. Leave a field blank to keep that default.

Free vs Pro at a glance

Capability	Free/Pro
One label for all products	Free
Labels per product type	Free
Already in cart, Empty price, Free product conditions	Free
On sale condition	Pro
Shortcodes in labels	Free

> **Note:** this plugin changes the button *text* only. It does not restyle the button (color, size or borders); use your theme or custom CSS for appearance.

WPFACTORY ACCOUNT

The On sale condition is a Pro feature of Change Add to Cart Button Text for WooCommerce. Upgrading takes a couple of minutes and unlocks it along with the rest of the Pro toolkit.
