How to Block Checkout When Cart Quantities Are Wrong

How to · https://wpfactory.com/docs/block-checkout-pages/

To stop customers from reaching checkout while their cart breaks your quantity rules, turn on **Block checkout page** in Min Max Step Quantity Limits Manager for WooCommerce. It is in the **General** section at **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**). The option is free.

What it does

When **Block checkout page** is on and a customer opens the checkout with a cart that breaks a minimum, maximum, step or fixed quantity rule, Quantity Manager sends them back to the cart page. With **Cart notices** on, the cart shows a message explaining which quantity to fix.

Before you start

- Quantity Manager installed and active. See how to install Quantity Manager.
- At least one quantity rule section enabled: **Minimum Quantity**, **Maximum Quantity**, **Quantity Step** or **Fixed Quantity**. Block checkout page does nothing when no rule section is on. See how to set a minimum order quantity or a maximum order quantity.

Set it up

1. Go to **WPFactory > Quantity Manager** and open the **General** section.
2. Check **Cart notices** (default: off) so wrong quantities are flagged on the cart, and choose a **Cart notice type**: **Notice** (default), **Error** or **Success**.
3. Check **Block checkout page** (default: off).
4. Click **Save changes**.
5. Test it: add a product with a quantity that breaks your rule, then open the checkout URL. You should land back on the cart with the notice.

> **Note:** the redirect works even when Cart notices is off, but then customers are sent back to the cart without being told why. Keep Cart notices on whenever you block checkout.

Options reference

Label	Option ID	Default	Free/Pro
Cart notices	`wpfmmsq_cart_notice_enabled`	No	Free
Cart notice type	`wpfmmsq_cart_notice_type`	Notice	Free
Block checkout page	`wpfmmsq_stop_from_seeing_checkout`	No	Free

Related options

- **"Add to cart" validation** (General, default: **Do not validate**) can check quantities when the product is added, either adding notices or auto-correcting the quantity. See how to validate and

auto-correct cart quantities.

- **Validate on checkout** (Advanced, default: on) also checks quantities when the order is placed.

FAQ

Is Block checkout page a Pro feature?

No. Block checkout page, Cart notices and Cart notice type are all free.

Why can customers still reach checkout?

Check that at least one rule section (Minimum Quantity, Maximum Quantity, Quantity Step or Fixed Quantity) is enabled and that the cart really breaks that rule. See minimum/maximum quantity settings not working.

Can I change the message customers see?

Yes. The texts are set in each rule section, and you can use placeholders such as the required and current quantity. See the message placeholders reference.

QUANTITY MANAGER

This feature is free. Min Max Step Quantity Limits Manager for WooCommerce Pro adds per-category and per-attribute quantity rules to enforce at checkout. Per-product minimum, maximum and step are free.
