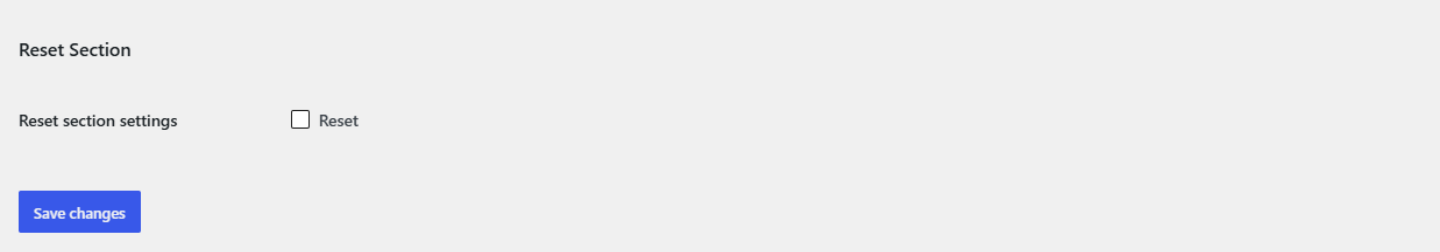
Reset a settings section to defaults

Every settings section in the Min Max Step Quantity Limits Manager for WooCommerce has its own reset control, so you can clear one section back to defaults without touching the rest. This is a free feature.



Steps

1. Go to **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**).
2. Open the section you want to clear, for example **Minimum Quantity**.
3. Scroll to **Reset Section** at the bottom and tick **Reset section settings**.
4. Click **Save changes**. The options in that section are deleted and revert to their defaults, and you will see a "Your settings have been reset" notice.

> **Important:** reset only affects the section you are viewing, and it cannot be undone. If you rely on custom messages or values in that section, copy them somewhere safe first.

When to use it

- You experimented with a section and want a clean starting point.
- A section behaves unexpectedly and you want to rule out a stale saved value.
- You are handing the store to a new owner and want defaults in one area.
