Configuring Checkbox, Datepicker, and Weekpicker Fields

How to · https://wpfactory.com/docs/checkbox-date-weekpick/

The Checkbox, Datepicker, and Weekpicker field types in Custom Checkout Fields for WooCommerce each add their own options group to the field tab. This guide covers the stored checkbox values and the full date-selection controls.

Before you start

- Go to **WPFactory > Custom Checkout Fields** (also reachable at **WooCommerce > Settings > Custom Checkout Fields**).
- Open a field tab and set **Type** to Checkbox, Datepicker, or Weekpicker. The matching options group then applies.

Checkbox Type Options

A checkbox stores one of two text values, which is what appears in emails, on the order, and in exports.

Label	Option ID	Default
Value for ON	`alg_wc_ccf_type_checkbox_yes_1`	Yes
Value for OFF	`alg_wc_ccf_type_checkbox_no_1`	No

To pre-tick the box, set the field's **Default value** to `1`; use `0` to leave it clear.

Datepicker / Weekpicker Type Options

Label	Option ID	Default
Date format	`alg_wc_ccf_type_datepicker_format_1`	Empty (uses your WordPress date format)
Min date (days)	`alg_wc_ccf_type_datepicker_mindate_1`	-365
Max date (days)	`alg_wc_ccf_type_datepicker_maxdate_1`	365
Year selector	`alg_wc_ccf_type_datepicker_changeyear_1`	No
Year selector: year range	`alg_wc_ccf_type_datepicker_yearrange_1`	`c-10:c+10`
First week day	`alg_wc_ccf_type_datepicker_firstday_1`	Sunday
Datepicker: Exclude days	`alg_wc_ccf_type_datepicker_excludedays_1`	None
Datepicker: Exclude months	`alg_wc_ccf_type_datepicker_excludemonths_1`	None
Datepicker: Exclude dates	`alg_wc_ccf_type_datepicker_excludedates_1`	Empty
Datepicker: Timepicker addon	`alg_wc_ccf_type_datepicker_timepicker_addon_1`	No

Notes

- **Min date and Max date** are a number of days relative to today. Enter `-30` for 30 days in the past or `30` for 30 days ahead. Set either to `0` for today. Both fields accept shortcodes.
- **Year selector: year range** uses colon-separated syntax: absolute `2020:2025`, relative to today `-10:+10`, or relative to the selected year `c-10:c+10`. A hyphen between the two values, such as `2020-2025`, is not valid here. This range only changes the year dropdown; use Min date and Max date to actually restrict which dates can be picked.
- **Exclude dates** takes a comma-separated list in `YYYY-MM-DD` format and supports the `*` wildcard, for example `****-12-25,****-01-01` to block every Christmas and New Year's Day.
- **Weekpicker** uses the same options group but selects a whole week rather than a single day.

Adding a time to the date

Enable **Datepicker: Timepicker addon** to let customers pick a time alongside the date. It adds its own time format (`alg_wc_ccf_type_datepicker_timepicker_addon_timeformat_1`, default `HH:mm`) plus optional Min time and Max time. This is separate from the standalone Timepicker field type, which is covered in Configuring timepicker fields.

CUSTOM CHECKOUT FIELDS FOR WOOCOMMERCE

These date options work on your single free field. Custom Checkout Fields for WooCommerce Pro lets you add up to 100 fields, so you can combine several date and text fields on one checkout.
