How to Restrict Payment Methods by Currency or Language in WooCommerce

How to · https://wpfactory.com/docs/conditional-payments-currency-language/

To restrict payment methods by currency or language in WooCommerce, use Conditional Payment Methods for WooCommerce: go to **WPFactory > Conditional Payment Gateways**, open the **Currency** or **Language** section, enable a Require or Exclude block, select currencies or languages next to each gateway and save.

These conditions are made for multi-currency and multilingual stores: for example, offer bank transfer only when the shopper pays in your local currency, or show a regional gateway only on one language version of the site.

Before you start

- Conditional Payment Methods installed and active.
- Free version: these rules work for Direct bank transfer, Check payments, Cash on delivery and PayPal Standard. Other gateways need Pro.
- Currency rules need a currency switcher that changes WooCommerce's active currency. Language rules need WPML or Polylang.

Restrict payment methods by currency

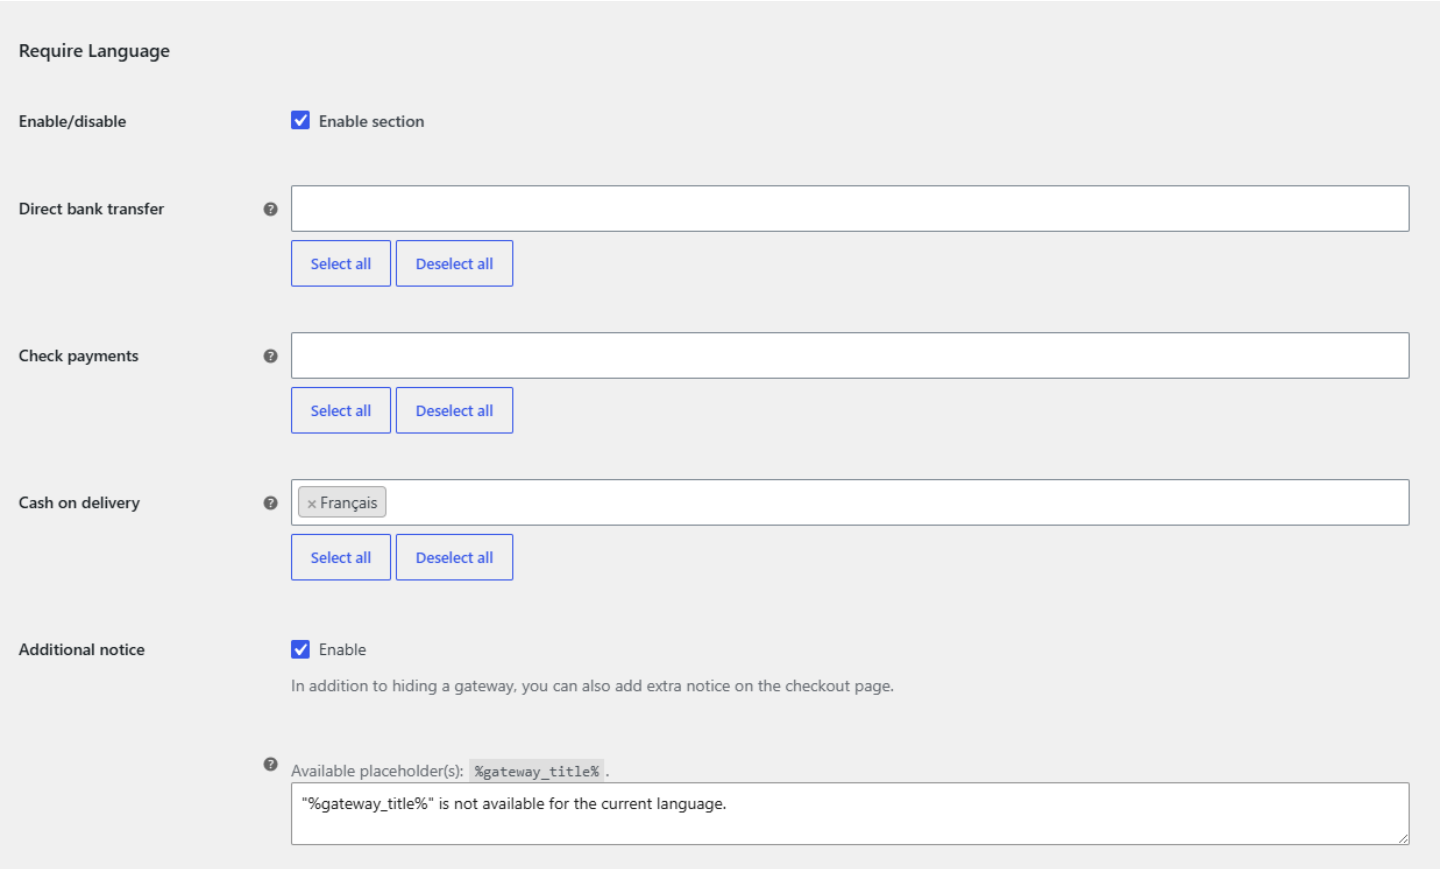

1. Go to **WPFactory > Conditional Payment Gateways** (also reachable at **WooCommerce > Settings > Conditional Payment Gateways**) and open the **Currency** section.
2. Tick **Enable section** under **Require Currency** to offer a gateway only in selected currencies, or under **Exclude Currency** to hide it in selected currencies.
3. Select the currencies next to each gateway. The list includes every currency WooCommerce knows.

4. Optionally edit the **Additional notice**. The default reads `"%gateway_title%" is not available for the current currency.`
5. Click **Save changes**.

The rule compares the currency WooCommerce reports as active during checkout. Without a currency switcher this is always your store currency, so the condition has no effect.

Restrict payment methods by language

1. Open the **Language** section. Its description tells you whether WPML or Polylang is detected (hover the plugin links).
2. Tick **Enable section** under **Require Language** or **Exclude Language**.
3. Select the languages next to each gateway. The list shows the languages configured in WPML or Polylang.
4. Optionally edit the **Additional notice**. The default reads `"%gateway_title%" is not available for the current language.`
5. Click **Save changes**.

FAQ

The language list is empty. What is wrong?

The list is filled from WPML or Polylang. If neither is active, it stays empty and a Require Language rule would hide the gateway for everyone. Activate your multilingual plugin and reload the section.

Can I translate the Additional notice?

Yes. Notices accept shortcodes, so you can wrap text per language with `[alg_wc_cpg_translate lang="EN,DE" lang_text="..." not_lang_text="..."]`. See the shortcodes reference.

Can I combine currency with a cart total limit?

Yes. All enabled conditions must pass, so you can, for example, require EUR and a minimum cart total for the same gateway. See hide a payment method based on cart total.

CONDITIONAL PAYMENT METHODS FOR WOOCOMMERCE

Currency and language rules are free for the four built-in WooCommerce gateways. Conditional Payment Methods for WooCommerce Pro applies them to any payment gateway.
