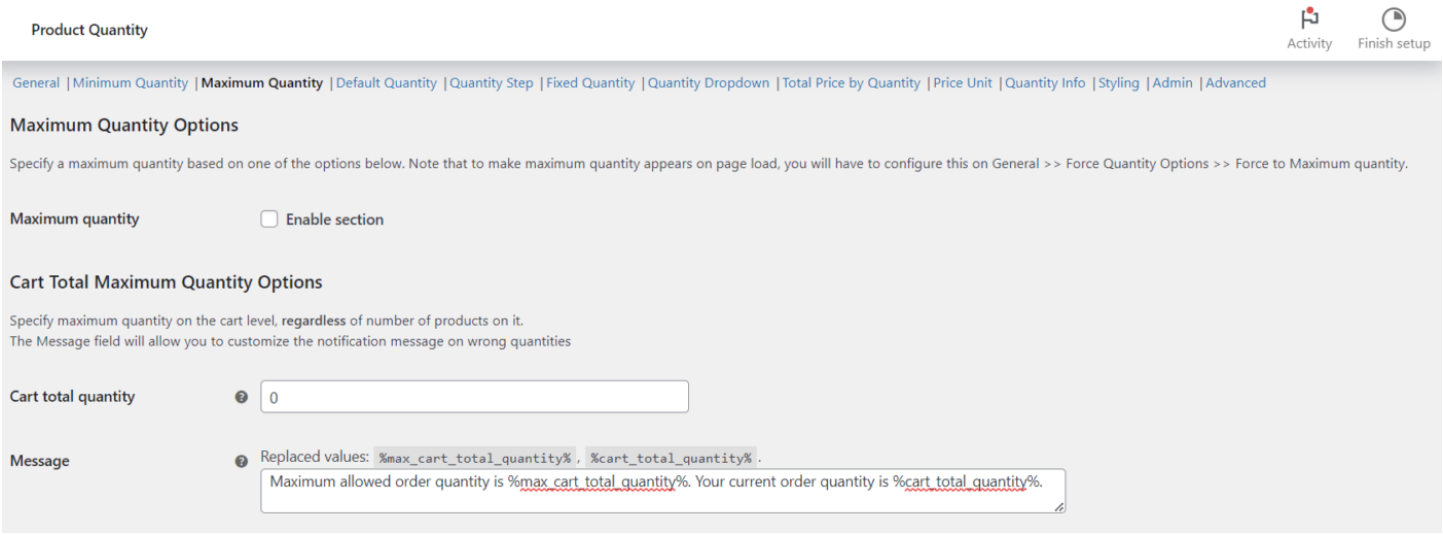
How to Set a Maximum Order Quantity in WooCommerce

How to · https://wpfactory.com/docs/woocommerce-maximum-order-quantity/

Set a maximum order quantity

A maximum order quantity caps how many units a customer can buy, per product or across the whole cart, which is useful for limited stock and fair-share promotions. You set it in the Maximum Quantity section of the Min Max Step Quantity Limits Manager for WooCommerce. The store-wide and per-product forms are free.



Steps

1. Go to **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**).
2. Open the **Maximum Quantity** section and tick **Maximum quantity** to enable it.
3. To cap each product, set **Per Item Maximum Quantity Options > All products** (`wpfmmsq_max_per_item_quantity`). Set to 0 to disable.

4. To cap the cart total, set **Cart Total Maximum Quantity Options > Cart total quantity** (`wpfmmsq_max_cart_total_quantity`).
5. Click **Save changes**.

Options reference

Label	Option ID	Default	Free/Pro
Maximum quantity (enable)	`wpfmmsq_max_section_enabled`	No	Free
All products	`wpfmmsq_max_per_item_quantity`	0	Free
Cart total quantity	`wpfmmsq_max_cart_total_quantity`	0	Free
Per product	`wpfmmsq_max_per_item_quantity_per_product`	No	Free

> **Tip:** to show the maximum in the quantity field on load, set **General > Initial Quantity Options > Single product page** to **Max quantity**. A maximum of 1 effectively limits customers to a single unit.

QUANTITY MANAGER

The store-wide and per-product maximums are free. Min Max Step Quantity Limits Manager for WooCommerce Pro adds per-category and per-attribute maximums.
