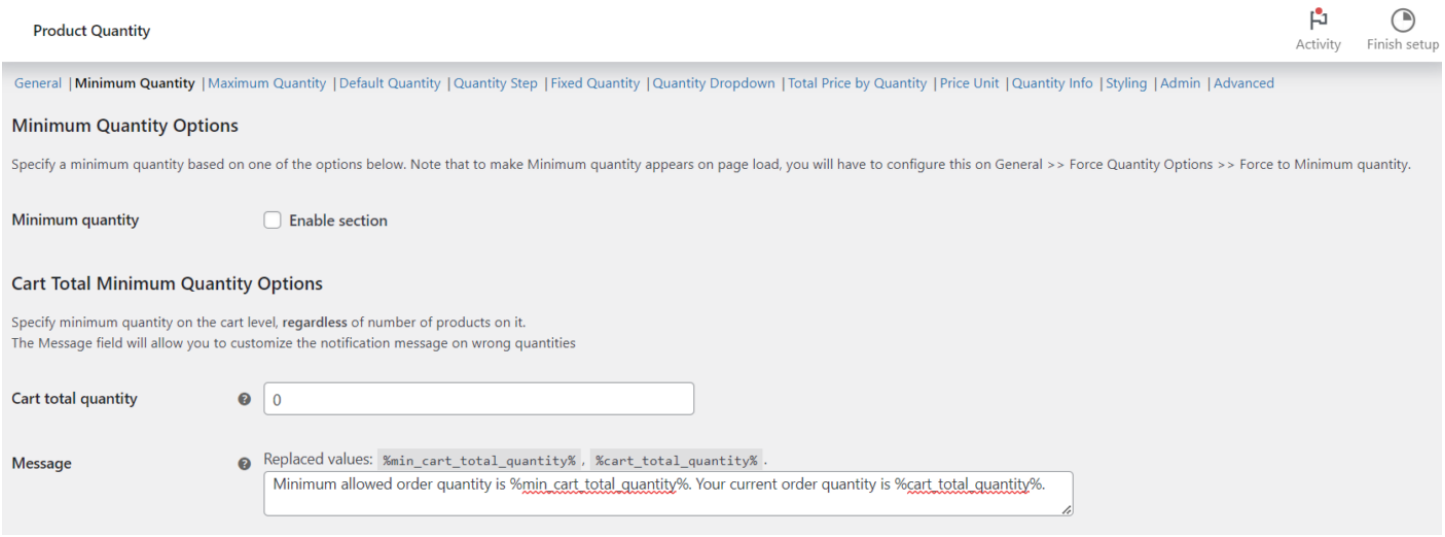
How to Set a Minimum Order Quantity in WooCommerce

How to · https://wpfactory.com/docs/woocommerce-minimum-order-quantity/

Set a minimum order quantity

A minimum order quantity stops customers from buying fewer units than you allow, either per product or across the whole cart. You set it in the Minimum Quantity section of the Min Max Step Quantity Limits Manager for WooCommerce. The store-wide and per-product forms are free.



Steps

1. Go to **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**).
2. Open the **Minimum Quantity** section and tick **Minimum quantity** to enable it.
3. To require a minimum for each product, set **Per Item Minimum Quantity Options > All products** (`wpfmmsq_min_per_item_quantity`). Set to 0 to disable.
4. To require a minimum total across the cart, set **Cart Total Minimum Quantity Options > Cart total quantity** (`wpfmmsq_min_cart_total_quantity`).

5. Edit the matching **Message** fields if you want custom wording, then click **Save changes**.

Options reference

Label	Option ID	Default	Free/Pro
Minimum quantity (enable)	`wpfmmsq_min_section_enabled`	No	Free
All products	`wpfmmsq_min_per_item_quantity`	0	Free
Cart total quantity	`wpfmmsq_min_cart_total_quantity`	0	Free
Per product	`wpfmmsq_min_per_item_quantity_per_product`	No	Free

Note: when a minimum is active, the quantity field starts at the minimum. If a default quantity is lower than the minimum, the minimum wins on load.

QUANTITY MANAGER

The store-wide and per-product minimums are free. Min Max Step Quantity Limits Manager for WooCommerce Pro adds per-category and per-attribute minimums.
