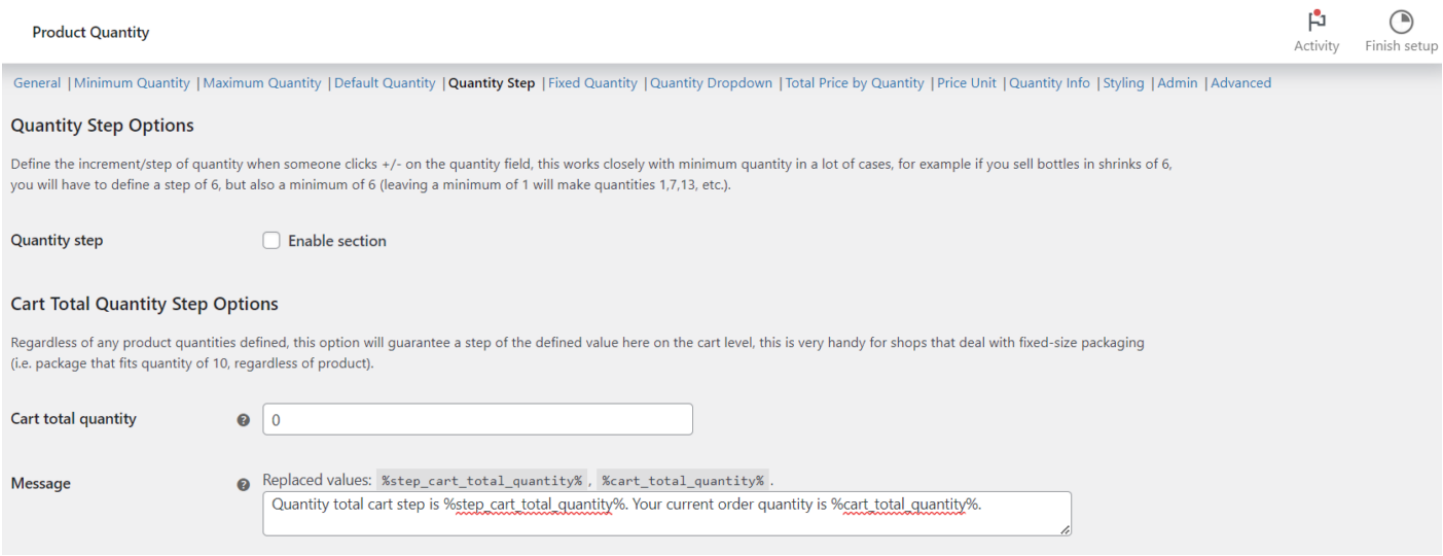
How to Sell Products in Multiples with a Quantity Step

How to · https://wpfactory.com/docs/woocommerce-quantity-step-increment/

A quantity step forces purchases to move in fixed increments, so customers buy in multiples such as 6, 12 or 18. This suits products packaged in fixed sizes. You set it in the Quantity Step section of the Min Max Step Quantity Limits Manager for WooCommerce, and the store-wide form is free.



Steps

1. Go to **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**).
2. Open the **Quantity Step** section and tick **Quantity step** to enable it.
3. Set **Per Item Quantity Step Options > All products** (`wpfmmsq_step`) to your increment, for example `6` .
4. To also step the cart total, set **Cart Total Quantity Step Options > Cart total quantity** (`wpfmmsq_step_cart_total_quantity`).
5. Click **Save changes**.

> **Important:** the step works with the minimum. A step of 6 with a minimum of 1 allows 1, 7, 13, and so on. For clean multiples (6, 12, 18) set both the step and the minimum to 6.

Options reference

Label	Option ID	Default	Free/Pro
Quantity step (enable)	`wpfmmsq_step_section_enabled`	No	Free
All products	`wpfmmsq_step`	0	Free
Cart total quantity step	`wpfmmsq_step_cart_total_quantity`	0	Free
Per product	`wpfmmsq_step_per_product_enabled`	No	Free

QUANTITY MANAGER

The store-wide and per-product steps are free. Min Max Step Quantity Limits Manager for WooCommerce Pro adds per-category and per-attribute steps, plus a low-stock exception.
