Advanced Field, Visibility and Display Options

How to · https://wpfactory.com/docs/configure-advanced-eu-vat/

Beyond the basic VAT field, the EU/UK VAT Manager for WooCommerce offers customer-choice options, visibility rules and display placement. These all live on the **General** sub-tab at **WPFactory > EU VAT** (also reachable at **WooCommerce > Settings > EU VAT**).

Let customer decide

When the VAT field is set to Required, you can still let a customer declare they are a private individual so the field becomes optional for them. Enable **Let customer decide** (`alg_wc_eu_vat_field_let_customer_decide`) and set the checkbox label with **Field label** (`alg_wc_eu_vat_field_let_customer_decide_label` , default *I don't have a VAT ID*). This option requires the VAT field to be set to Required.

Valid VAT but not exempted

Some buyers hold a valid VAT number but must still pay VAT (a scenario that can apply in Belgium). Enable **Valid VAT but still paying?** (`alg_wc_eu_vat_belgium_compatibility`) to add a checkbox letting them opt to keep VAT, with the label set by `alg_wc_eu_vat_belgium_compatibility_label`.

Visibility options

Label	Option ID	Default	Free/Pro
Show field for selected countries only	`alg_wc_eu_vat_show_in_countries`	(all countries)	Pro
Show field for selected user roles only	`alg_wc_eu_vat_show_for_user_roles`	(all roles)	Pro
Show/hide by billing company	`alg_wc_eu_vat_show_hide_by_billing_company`	No	Free
Hide EU VAT field from checkout	`alg_wc_eu_vat_hide_eu_vat`	No	Free

Note that country and user-role targeting are Pro. Showing or hiding the field by whether the billing company is filled in, and fully hiding the field (for page-builder checkouts), are free.

Display options

- **Display** (`alg_wc_eu_vat_display_position`): where the confirmed VAT number appears, *After order table* (default) or *In billing address*.
- **Display template** (`alg_wc_eu_vat_field_display_template`): the wording used for the "In billing address" placement. Supports the `%eu_vat_number%` placeholder.
- **Show VAT details in checkout** (`alg_wc_eu_vat_show_vat_details`): pulls the business name and address returned by VIES into the checkout.

The **Priority**, **Max length**, **Clear**, **CSS class** and **Label CSS class** field settings are all part of the free version.

EU/UK VAT MANAGER FOR WOOCOMMERCE

EU/UK VAT Manager for WooCommerce Pro adds country-level and user-role visibility for the VAT field.
