Configuring Payment Gateways per Products: Settings Overview

How to · https://wpfactory.com/docs/configuring-payment-gateways/

Configure the plugin settings

The settings for Payment Methods by Product & Country for WooCommerce are organized into tabs. This article explains what each tab does so you know where to set your rules. Go to **WPFactory > Payment Gateways per Products** (also reachable at **WooCommerce > Settings > Payment Gateways per Products**).

The settings tabs

Tab	What it does	Free/Pro
General	Advanced options: the fallback gateway and the "Add filter" timing option.	Mixed
Product Categories	Show or hide each gateway based on the categories of products in the cart.	Free
Product Tags	Show or hide each gateway based on the tags of products in the cart.	Free
Products	Show or hide each gateway based on individual products or variations.	Pro
Countries	Restrict gateways to specific billing countries.	Pro

Enabling a section

There is no single switch that turns the whole plugin on or off. Instead, each tab has its own **Enable/Disable > Enable section** checkbox:

- **Product Categories** (`alg_wc_pgpp_product_cat_section_enabled`) and **Product Tags** (`alg_wc_pgpp_product_tag_section_enabled`) are enabled by default.
- **Products** (`alg_wc_pgpp_products_section_enabled`) and **Countries** (`alg_wc_pgpp_countries_remove_enabled`) are Pro and off by default.

General tab: Advanced Options

Setting	Option ID	Default	Free/Pro
Fallback gateway (Enable)	`alg_wc_pgpp_advanced_fallback_gateway_enabled`	No	Pro
Choose fallback gateway	`alg_wc_pgpp_advanced_fallback_gateway`	(none)	Pro
Add filter	`alg_wc_pgpp_advanced_add_hook`	On "init" action	Free

- **Fallback gateway:** a Pro option that shows one chosen gateway only when your rules would otherwise leave the cart with no available payment method. See the fallback how-to for details.
- **Add filter:** controls when the plugin registers its gateway filter (*In constructor*, *On "init" action*, or *On "wp_loaded" action*). Leave it on *init* unless a theme or another plugin causes gateways not to filter correctly, then try another option.

Reset a section

Each tab ends with a **Reset Section > Reset settings** checkbox. Ticking it and saving clears only that tab's options and shows a "Your settings have been reset" notice.

Remember

- Category and tag rules are free; per-product, per-country and fallback rules require Pro.
- Always click **Save changes** after editing a tab.

PAYMENT GATEWAYS PER PRODUCTS

Ready to go beyond categories and tags? Payment Methods by Product & Country for WooCommerce Pro adds per-product, per-country and fallback rules.
