Hide and Redirect Coupons Options

How to · https://wpfactory.com/docs/coupon-concealment-redirect/

Hide the coupon field and redirect after applying

Hiding the coupon field and redirecting after a coupon is applied give you a cleaner checkout when you drive discounts through links rather than a coupon box. Coupons & Add to Cart by URL Links for WooCommerce covers both from the **General** sub-tab. Hiding the coupon field is free; the redirect options are Pro.

Go to **WPFactory > Coupons by URL** (also reachable at **WooCommerce > Settings > URL Coupons**).

Hide Coupon Options (Free)

- **Cart page:** tick **Hide** to remove the standard coupon input field on the cart page.
- **Checkout page:** tick **Hide** to remove the standard coupon input field on the checkout page.
- **Hide condition:** choose **Always hide** to remove the field at all times, or **Hide if coupon applied via URL** to hide it only once a URL coupon has been applied.

Label	Option ID	Default	Free/Pro
Hide coupon field: cart page	`alg_wc_url_coupons_cart_hide_coupon`	No	Free

Label	Option ID	Default	Free/Pro
Hide coupon field: checkout page	`alg_wc_url_coupons_checkout_hide_coupon`	No	Free
Hide condition	`alg_wc_url_coupons_hide_coupon_condition`	Always hide	Free

Redirect Options (Pro)

- **Redirect URL:** after a coupon is applied, keep the customer where they are (No redirect), or send them to the cart, the checkout, or a custom local URL.
- **Custom local URL:** the page to use when **Redirect URL** is set to "Redirect to custom local URL".
- **Redirect URL per coupon:** add a **URL Coupons: Redirect URL** field to each coupon, so a coupon's own URL takes priority over the global setting. See the guide on setting a redirect URL per coupon.

Label	Option ID	Default	Free/Pro
Redirect URL	`alg_wc_url_coupons_redirect`	No redirect	Pro
Custom local URL	`alg_wc_url_coupons_redirect_custom_url`	(empty)	Pro
Redirect URL per coupon	`alg_wc_url_coupons_redirect_per_coupon`	No	Pro

Note on notices

> **Note:** if you redirect to a page where WooCommerce notices are not shown, add the `[alg_wc_url_coupons_print_notices]` shortcode to that page's content so the customer still sees the coupon message. This shortcode prints all available WooCommerce notices, not only coupon notices.

Each sub-tab also has a **Reset section settings** checkbox to return that section to its defaults.

URL COUPONS

Hiding the coupon field is free. The redirect options are part of URL Coupons Pro, which also adds custom notices and add-to-cart coupons.
