Create Multiple XML Feeds

Pro Features · https://wpfactory.com/docs/create-multiple-xml-feeds/

To create multiple feeds in Product XML Feeds Manager for WooCommerce Pro, go to WPFactory > Product XML Feeds, set Total XML files (feeds) on the General section to the number you need, and click Save changes. A new XML Feed section appears for each feed. The free version is capped at one feed.

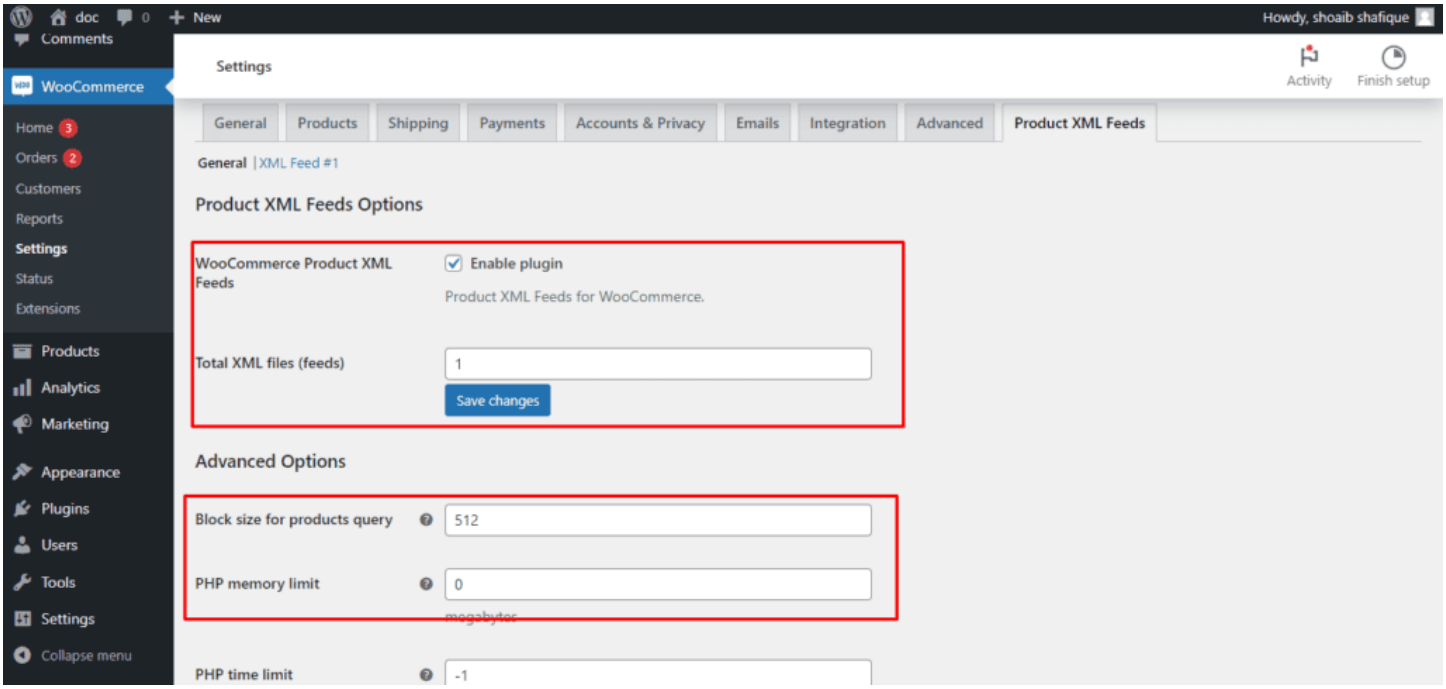

Before you start

- WooCommerce, active.
- Product XML Feeds Manager for WooCommerce Pro (running more than one feed is a Pro feature).

How the feed count works

The number of feeds is set by **Total XML files (feeds)** (`alg_products_xml_total_files`, default 1) in the **General** section. On the free version this field is capped at 1. Pro removes the cap, so you can enter any number.

Go to **WPFactory > Product XML Feeds** (also reachable at **WooCommerce > Settings > Product XML Feeds**). You land on the **General** section by default.

Step by step

1. On the **General** section, set **Total XML files (feeds)** to the number of feeds you need.
2. Click **Save changes**. A new **XML Feed #n** section appears for each feed.
3. Open each **XML Feed #n** section and configure it independently: its own **XML file path and name** (`alg_products_xml_file_path_{n}` , defaulting to `products_2.xml` , `products_3.xml` and so on), template, filtering, and update period.
4. Use the **Admin title** field (`alg_products_xml_feed_title_{n}`) to give each feed a recognizable name in the section tabs.
5. Click **Create now** in each section, or let each feed rebuild on its own schedule.

> **Note:** every feed carries the same option ids with its own number as a suffix. Feed 1 uses `alg_products_xml_file_path_1` , feed 2 uses `alg_products_xml_file_path_2` , and so on. Each feed can be enabled or disabled separately with `alg_products_xml_enabled_{n}` .

Use cases

- A Google Shopping feed and a separate Facebook catalog feed, each with the fields those platforms require.

- One full-catalog feed plus a smaller "on sale only" feed for a promotions partner.
- Region-specific feeds, each filtered to different categories or currencies.

PRODUCT XML FEEDS MANAGER FOR WOOCOMMERCE

Running more than one feed is a Pro feature of Product XML Feeds Manager for WooCommerce. If you are still on the free version, upgrading takes a couple of minutes and unlocks unlimited feeds along with the rest of the Pro toolkit.
