Adding a Checkout Fee Based on a Custom Field

How to · https://wpfactory.com/docs/custom-field-charges/

Each field in Custom Checkout Fields for WooCommerce can add a fee to the cart total when the customer fills it in. This is useful for optional paid services such as gift wrapping, express handling, or engraving. This guide covers the Fee Options group.

How the fee triggers

The fee is added whenever the field's value is **not empty** at checkout. For a checkbox, that means the box is ticked; for a text or select field, that means the customer entered or chose something. If the field is left empty, no fee is added. A fee value of `0` is ignored.

Open the Fee Options

1. Go to **WPFactory > Custom Checkout Fields** (also reachable at **WooCommerce > Settings > Custom Checkout Fields**).
2. Open the field tab you want to attach a fee to, and scroll to **Fee Options**.

Options reference

Label	Option ID	Default
Fee value	`alg_wc_ccf_fee_value_1`	0
Fee type	`alg_wc_ccf_fee_type_1`	Fixed
Percent fee: Cart total	`alg_wc_ccf_fee_percent_total_1`	Subtotal after discounts
Add shipping cost to cart total	`alg_wc_ccf_fee_percent_shipping_1`	No
Fee title	`alg_wc_ccf_fee_title_1`	Empty
Is fee taxable	`alg_wc_ccf_fee_taxable_1`	Yes

Fixed vs percent fees

- **Fixed:** a flat amount in your store currency. It can be positive (a surcharge) or negative (a discount).
- **Percent:** a percentage of the cart. When you choose Percent, use **Percent fee: Cart total** to pick the base:
  - **Subtotal before discounts** calculates against the cart subtotal.
  - **Subtotal after discounts** calculates against the discounted subtotal.

  Enable **Add shipping cost to cart total** to include shipping in the base amount.

Notes

- **Fee title** is the label shown on the cart and checkout totals next to the fee. Keep it clear, for example "Gift wrapping".

- Combine a fee with a checkbox field for a simple opt-in charge, or with a Select field to offer tiered options.

CUSTOM CHECKOUT FIELDS FOR WOOCOMMERCE

You can attach a fee to your single free field. Custom Checkout Fields for WooCommerce Pro lets you run up to 100 fields, each with its own fee, so you can offer several paid add-ons at checkout.
