How to Add a Custom Tab to a Single Product

How to · https://wpfactory.com/docs/custom-tab-per-product/

The **Custom Tabs: Per Product** feature of Additional Custom Product Tabs for WooCommerce lets you add a tab to a single product, right from its edit screen. Use it for details that only apply to that one product. The free version allows **one** per-product tab; Product Tabs Pro lets you add several per product.

Turn the feature on

Go to **WPFactory > Product Tabs** (also reachable at **WooCommerce > Settings > Product Tabs**) and open the **Custom Tabs: Per Product** section. The settings here are:

Label	Option ID	Default	Free/Pro
Custom tabs: Per product (Enable section)	`alg_custom_product_tabs_local_enabled`	Yes	Free
Enable WP editor	`alg_custom_product_tabs_local_wp_editor_enabled`	Yes	Free

Label	Option ID	Default	Free/Pro
Default per product custom product tabs number	`alg_custom_product_tabs_local_total_number_default`	1	Read only in Free, editable in Pro

When **Enable WP editor** is on, each tab content field uses the full WordPress visual editor. Turn it off to use a plain text area instead. **Default per product custom product tabs number** sets how many tab slots each product starts with; it is fixed at 1 in the free version.

Add the tab on the product

1. Edit any product. Scroll to the **Custom Product Tabs** meta box below the product data panel.
2. Fill in the tab fields:
   - **Title** (meta key `_alg_custom_product_tabs_title_local_1`): the tab heading. Shortcodes are allowed.
   - **ID** (`_alg_custom_product_tabs_id_local_1`): a unique key, defaults to `local_1`.
   - **Position** (`_alg_custom_product_tabs_priority_local_1`): the order number, defaults to 50.
   - **Content** (`_alg_custom_product_tabs_content_local_1`): the tab body.
3. Click **Update** to save the product. As with global tabs, a tab shows only when both Title and Content are set.

> **Note:** the **Total number of custom tabs** field in the meta box is read only in the free version. To add more than one tab to a product, change this number in Pro and click Update.

Reset the section

The section has a **Reset section settings** checkbox at the bottom of the settings page that restores its options to their defaults.

PRODUCT TABS

One tab per product is free. Additional Custom Product Tabs for WooCommerce Pro lets you add as many per-product tabs as you need.
