Unlimited Custom Tabs: All Products, Per Product and Variations

Pro Features · https://wpfactory.com/docs/custom-tabs-per-products/

Add unlimited custom tabs with Product Tabs Pro

The Pro version of Additional Custom Product Tabs for WooCommerce lets you add as many custom tabs as you want, where the free version is capped at one global tab and one per-product tab. This article covers the three custom-tab areas and what changes when you upgrade.

Custom Tabs: All Products (global)

Global tabs appear on every product. Use them for shipping, warranty, care or sizing information you want to keep consistent across the catalog. In Pro you set the **Custom product tabs number** (`alg_custom_product_tabs_global_total_number`) to any value and each tab gets its own Title, ID, Position and Content, plus show and hide controls by product and category. The free version fixes this number at 1.

Custom Tabs: Per Product

Per-product tabs are added from the **Custom Product Tabs** meta box on a product's edit screen, so they apply to that one product only. In Pro you raise the **Total number of custom tabs** on the product (or the site-wide default, `alg_custom_product_tabs_local_total_number_default`) and add several tabs to a single product. The free version allows one.

Variations Tabs

Variations tabs add one tab per variation on a variable product, filled from shortcodes. This feature is available in both the free and Pro versions; it is off by default and enabled in the **Variations Tabs** section.

Free vs Pro at a glance

Area	Free	Pro
Global custom tabs	1	Unlimited
Per-product custom tabs	1 per product	Unlimited per product
Variations tabs	Yes	Yes
Show or hide a tab by product or category	Yes (on the 1 global tab)	Yes (on every global tab)

PRODUCT TABS

This is a Pro capability of Product Tabs. If you are still on the free version, upgrading unlocks unlimited global and per-product tabs.
