How to Set One Add to Cart Label for All Products

How to · https://wpfactory.com/docs/customize-cart-labels/

To set one Add to Cart label for all products, use the **All Products** section of Change Add to Cart Button Text for WooCommerce. It applies a single button label across your whole store in one place, which is the fastest way to replace the default "Add to cart" wording everywhere. This section is free.

Step-by-step setup

1. Go to **WPFactory > Add to Cart Button Labels** (also reachable at **WooCommerce > Settings > Add to Cart Button Labels**).
2. Open the **All Products** section.
3. Tick **Enable section**.
4. Enter your text in **Single product page** and **Shop page**.
5. Click **Save changes**.

Options reference

Label	Option ID	Type	Default
All products labels (Enable section)	`alg_wc_add_to_cart_button_labels_all_products_enabled`	Checkbox	`no`
Single product page	`alg_wc_add_to_cart_button_labels_all_products_single`	Text	Empty
Shop page	`alg_wc_add_to_cart_button_labels_all_products_archive`	Text	Empty

Single product page sets the button on an individual product's page. **Shop page** sets it on the shop, category and other archive listings. Either field is ignored if you leave it empty, so the default WooCommerce text stays for that view.

Dynamic labels with shortcodes

You can add live product or customer details to the label using any of these shortcodes:

- `[alg_wc_atcbl_user_name]`: the current customer's username, or "Guest".
- `[alg_wc_atcbl_product_title]`: the product title.
- `[alg_wc_atcbl_product_price]`: the product price.
- `[alg_wc_atcbl_product_stock]`: the product's stock quantity.
- `[alg_wc_atcbl_product_meta key="..."]`: a custom field value.
- `[alg_wc_atcbl_product_func name="..."]`: the result of a product method.
- `[alg_wc_atcbl_translate]`: language-specific text on WPML or Polylang sites.

Remember precedence

All Products is the broadest rule, so it is overridden by any more specific section you also enable (product type, category, tag, product, user role or user). Use it as your baseline, then override where needed.

Resetting the section

To revert this section, tick **Reset section settings** at the bottom of the tab and click **Save changes**

.

WPFACTORY ACCOUNT

This section is free. Change Add to Cart Button Text for WooCommerce Pro adds unlimited category, tag, user role and user groups, plus separate labels for on-sale products.
