User-Specific Minimum and Maximum Order Requirements

Pro Features · https://wpfactory.com/docs/customized-order-limits/

Order Minimum/Maximum Amount for WooCommerce Pro lets you set minimum and maximum order limits for individual users on their profile pages. Enable the user section, set Guest Fallback limits for shoppers without a profile, and define limits for order total, quantity, weight, volume, dimensions, and the number of products, categories, or tags.

Order Minimum/Maximum Amount for WooCommerce Pro offers a powerful feature for setting order limits based on user roles. But what if you need even more granular control? The Pro version allows you to define **optional amounts per user** on their profile pages.

Here's how it works:

- **Enable the user section:** Activate this feature to configure minimum and maximum limits for individual users.

- **Guest Fallback:** This setting defines the default limits for non-registered users (guests) who wouldn't have a user profile.

Configurable Options (per User):

- **Minimum and Maximum:** Set limits for various aspects of the order, including:
  - Order total (sum)
  - Quantity of items
  - Weight
  - Volume
  - Dimensions (length, width, area)
  - Number of products
  - Product categories
  - Product tags

Advanced: Priority Options

This section, already explained previously, allows you to define the order in which minimum and maximum limits are applied. Lower priority settings are evaluated first. You can even:

- **Ignore limits:** Set a priority of 0 to disregard limits from this section and use those defined elsewhere (e.g., general settings).
- **Remove limits entirely:** Use a negative priority value (e.g., -1) to eliminate any user-specific limits for that particular criteria.

Benefits of User-Specific Limits:

- **Wholesale accounts:** Set higher minimum order amounts for wholesale customers.
- **Reward loyal customers:** Offer lower minimums or special promotions for frequent buyers.
- **Manage specific user needs:** Cater to users with unique buying patterns.

With Order Minimum/Maximum Amount for WooCommerce Pro, you can create a highly customized order management system that adapts to your diverse customer base.

ORDER MIN/MAX AMOUNT
