Additional Checkout Fields: Free vs Pro Versions Compared

Pro Features · https://wpfactory.com/docs/difference-between-free-and-pro-features/

Difference between the free and Pro versions

The difference between the free and Pro versions of Custom Checkout Fields for WooCommerce is simple: how many custom fields you can add. Every field type and every option is available in the free version. The Pro version raises the field limit.

The core difference

Capability	Free	Pro
Number of custom fields	1	Up to 100
All 19 field types (Text, Textarea, Number, Checkbox, Datepicker, Weekpicker, Timepicker, Select, Multiselect, Radio, Password, Country, State, Email, Phone, Color, Search, URL, Range)	Yes	Yes
Position options (Billing, Shipping, Account, Order notes, Priority)	Yes	Yes
Visibility rules (categories, tags, products, user roles, cart amount, shipping class, countries, by another field)	Yes	Yes
Fee options (fixed and percent)	Yes	Yes
Input, style, and type-specific options (Select2, datepicker, timepicker)	Yes	Yes
Duplicate a field per product / product item in cart	Yes	Yes

What this means in practice

On the free version you configure a single field with the full option set: any type, any section, visibility rules, and a fee if you want one. That covers stores that need just one extra piece of information at checkout, such as a delivery date or a VAT number.

The Pro version unlocks the **Custom fields number** setting (`alg_wc_ccf_total_number`) so you can add up to 100 fields. Each additional field has exactly the same options as the first. That is the whole upgrade: more fields, nothing hidden behind a separate feature wall.

CUSTOM CHECKOUT FIELDS FOR WOOCOMMERCE

If you need more than one checkout field, upgrading takes a couple of minutes and lifts the limit to 100.
