Difference between Free and Pro versions

Pro Features · https://wpfactory.com/docs/difference-between-free-and-pro-versions/

The free version of Name Your Price: Make Your Own Offer for WooCommerce includes the offer button, the full offer form, styling, every email and manual accept, reject and counter handling for all products. Pro adds offers on selected products, categories and variations, the button on shop pages, automatic accept and reject, and Dokan support.

Free vs Pro comparison

This comparison is checked against the plugin code. Settings live at **WPFactory > Price Offers** (also reachable at **WooCommerce > Settings > Price Offers**).

Feature	Free	Pro
Enable offers for all products	Yes	Yes
Exclusions: out of stock, with price, above/below price	Yes	Yes
Show the button to logged-in users only	Yes	Yes
Enable for selected products only (per product / per variation)	No	Yes
Per product category (require / exclude categories)	No	Yes
Button label, HTML class, HTML style, single-product position + priority	Yes	Yes
Button on archive (shop/category) pages and custom hooks	No	Yes
Full form control: fields, required fields, price step/min/max/default, quantity	Yes	Yes
Per-product price step / min / max / default price and quantity, per-product auto-accept / auto-reject price	No	Yes
Form styling, header/footer, customer notice	Yes	Yes

Feature	Free	Pro
Notification email + reject / accept / counter emails and sender options	Yes	Yes
Offers dashboard, product offers meta box + columns, currency code	Yes	Yes
Prevent duplicate offers, auto-complete / auto-uncomplete	Yes	Yes
Auto-accept / auto-reject offers by price threshold	No	Yes
Payment gateway restriction, exclude offers from coupons, background emails, REST API	Yes	Yes
Dokan multi-vendor integration	No	Yes

In short, everything about the button, form, styling, emails, and manual offer handling is free. Pro is worth it when you need to enable offers on *specific* products, categories, or variations, place the button on shop pages, or let the plugin accept and reject offers automatically.

How to tell which options are Pro

In the free version, Pro options are visible but greyed out, with a note that says you need the Pro version to use them. In practice these are:

- **Products** set to **Enable for selected products only** (General section), and the selected products, variations and categories fields that go with it.
- The **Advanced Positions Options** in the Button section (shop and category pages, custom hooks).
- Auto-accept and auto-reject in the Automation section.
- The Dokan option in the Compatibility section.

Every other field works in the free version.

How to upgrade

1. Buy Pro and download the Pro zip from your WPFactory account.
2. Go to **Plugins > Add New > Upload Plugin**, upload the zip and activate it.

3. Open **WPFactory > Price Offers**. The Pro options are now editable, and your existing settings and offers are kept.

FAQ

Do I need to keep the free plugin installed with Pro?

No. Pro is a complete plugin. If both are active, the free copy detects Pro and stops loading, so nothing runs twice. You can deactivate and delete the free copy.

Will I lose my settings or offers when I upgrade?

No. Free and Pro use the same settings and the same offers list, so everything you configured carries over.

Can I restrict offers to certain products in the free version?

Partly. The free version can exclude products that are out of stock, have a price, or are above or below a price you set. Choosing specific products, variations or categories is Pro, see enable price offers for selected products.

Is auto-accept available in the free version?

No. Automatic accept and reject by price threshold is Pro, see auto-accept and auto-reject price offers. Manual accept, reject and counter, with their emails, are free.
