How to Customize the Make an Offer Button and Form

Troubleshooting · https://wpfactory.com/docs/display-customize-make-offer-form/

In Name Your Price: Make Your Own Offer for WooCommerce, the offer form always opens in a popup when a customer clicks **Make an offer**; it cannot be embedded inline. You choose where the button appears, which fields the form shows and its colors under **WPFactory > Price Offers** on the **Button**, **Form** and **Styling** tabs.

What you can and cannot do

- **The form is a popup (modal).** There is no setting, shortcode or attribute that prints the full form directly on a page.
- **The only button shortcode is `[alg_wc_price_offers_button]`.** It prints the button for the product being viewed, so it works in single product templates (for example an Elementor or block theme product template). It takes no attributes: `product_id`, `show` or `render` are ignored, and shortcodes such as `[price_offering_form]` do not exist. See Name Your Price: Shortcodes Guide.
- All button, form and styling options below are free.

Step 1: Place the button

1. Go to **WPFactory > Price Offers** (also reachable at **WooCommerce > Settings > Price Offers**) and open the **Button** tab.
2. Set **Label** (default Make an offer), **HTML class** (default `button`, so it inherits your theme's button style) and optional inline **HTML style**.
3. Choose **Position on single product page** (default Inside single product summary) and its **Position priority** (default 31). Choose **Do not add** if you place the button with the shortcode instead.

4. Showing the button on shop and archive pages, or on custom hooks, uses the Pro **Advanced Positions Options**. See How to Craft the Offer Button in Name Your Price.

Step 2: Choose the form fields

On the **Form** tab, **Enabled fields** adds optional fields: Quantity, Customer name, Customer phone, Customer message, reCAPTCHA and the Send a copy to customer checkbox. Price input, Customer email and the Send button are always shown. By default Customer name, Customer message and the copy checkbox are on. Use **Required fields** to make any of them mandatory, and set the price step, minimal, maximal and default price. Details: How to Customize Form Field Options in Name Your Price .

Step 3: Edit the header, footer and notice

Also on the **Form** tab, under **Form and Notice Options**: **Form header** (supports `%product_title%`), **Form button** label (default Send) and HTML style, **Form footer**, **Required HTML**, and the **Customer notice** shown after sending (default "Your price offer has been sent."). See Form and Notice Options in Name Your Price.

Step 4: Set the colors and width

On the **Styling** tab, **Form Styling Options** sets:

Label	Option ID	Default
Width	`alg_wc_price_offerings_styling[form_content_width]`	80%
Header background color	`alg_wc_price_offerings_styling[form_header_back_color]`	#3d9cd2
Header text color	`alg_wc_price_offerings_styling[form_header_text_color]`	#ffffff
Footer background color	`alg_wc_price_offerings_styling[form_footer_back_color]`	#3d9cd2
Footer text color	`alg_wc_price_offerings_styling[form_footer_text_color]`	#ffffff

More: Form Styling Options in Name Your Price.

Step 5: Fine-tune with custom CSS

If your theme overrides the popup, add CSS in **Appearance > Customize > Additional CSS** (or your child theme). The popup uses these classes: `.alg-wc-price-offerings-modal` (overlay), `.alg-wc-price-offerings-modal-content`, `.alg-wc-price-offerings-modal-header`, `.alg-wc-price-offerings-modal-body` and `.alg-wc-price-offerings-modal-footer`. The button has the class `.alg-wc-price-offerings-button` inside `.alg-wc-price-offerings-button-wrapper`. Example:

```
.alg-wc-price-offerings-modal-content { max-width: 560px; border-radius: 6px; }
.alg-wc-price-offerings-button { margin-top: 10px; }
```

Confirm the result

Clear your cache, open a product in a private window, click the button and check the popup on desktop and mobile. Send a test offer and check that it appears under **Offers** in wp-admin.

NAME YOUR PRICE

The button, form and styling options are free. Name Your Price Pro adds archive and custom-hook button positions, offers on selected products, categories and variations, and auto-accept and auto-reject.
