Showing Custom Field Data in WooCommerce Emails

How to · https://wpfactory.com/docs/email-settings-checkout/

To include your custom field values in WooCommerce order emails, use the email settings on the General tab of Custom Checkout Fields for WooCommerce. You can add fields to admin and customer emails and control exactly how each field is formatted.

Open the email settings

Go to **WPFactory > Custom Checkout Fields** (also reachable at **WooCommerce > Settings > Custom Checkout Fields**) and look in the **General Options** group on the General tab.

Options reference

Label	Option ID	Default

Add all fields to admin emails	`alg_wc_ccf_email_all_to_admin`	Yes
Add all fields to customers emails	`alg_wc_ccf_email_all_to_customer`	Yes
Before the fields	`alg_wc_ccf_emails_template_before`	Empty
Each field	`alg_wc_ccf_emails_template_field`	`<p><strong>%label%:</strong> %value%</p>`
After the fields	`alg_wc_ccf_emails_template_after`	Empty

Formatting each field

The **Each field** template controls how a single field is rendered in the email. It accepts two placeholders:

Placeholder	Outputs
`%label%`	The field's label
`%value%`	The value the customer entered

CUSTOM CHECKOUT FIELDS FOR WOOCOMMERCE

See every feature and the pricing on the Custom Checkout Fields for WooCommerce plugin page.

View plugin →

Use **Before the fields** and **After the fields** to wrap the whole block, for example a heading before and a divider after.
