Admin Options and Advanced Tools

How to · https://wpfactory.com/docs/eu-vat-admin-tools/

The EU/UK VAT Manager for WooCommerce adds order-level VAT tools for the store admin and a set of advanced switches for tricky hosting or caching cases. In current versions these live on two separate sub-tabs, **Admin** and **Advanced**, at **WPFactory > EU VAT** (also reachable at **WooCommerce > Settings > EU VAT**).

Admin sub-tab

Label	Option ID	Default	Free/Pro
Meta box (order edit page)	`alg_wc_eu_vat_add_order_edit_metabox`	No	Free
Column (orders list)	`alg_wc_eu_vat_add_order_list_column`	No	Free
VAT validation for orders created manually from admin	`alg_wc_eu_vat_validate_vat_admin_side`	No	Free
Admin new order email	`alg_wc_eu_vat_admin_new_order_email`	No	Free

The same Admin sub-tab also links to two references: the **Field ID used for EU VAT** (`_billing_eu_vat_number`), the **Tools > EU country VAT Rates** tool for adding standard EU rates, and the **WooCommerce > Reports > Taxes > EU VAT** report. It also documents the multilingual `[alg_wc_eu_vat_translate]` shortcode.

Advanced sub-tab

- **Debug** (`alg_wc_eu_vat_debug`): writes a log you can read at **WooCommerce > Status > Logs**.
- **Force VAT recheck on checkout** (`alg_wc_eu_vat_force_checkout_recheck`): re-validates on each checkout, useful with dynamic caching.
- **Sitepress optimizer dynamic caching plugin** (`alg_wc_eu_vat_sitepress_optimizer_dynamic_caching`): a compatibility toggle for that caching plugin.
- **Manual validation of VAT numbers** (`alg_wc_eu_vat_manual_validation_enable`) and **VAT numbers to pass validation** (`alg_wc_eu_vat_manual_validation_vat_numbers`): treat a defined list of numbers as valid.
- **Checkout block field** (`alg_wc_eu_vat_enable_checkout_block_field`): registers the field for block-based checkout.

All Admin and Advanced options here are part of the free version.

VAT shifted text

EU/UK VAT MANAGER FOR WOOCOMMERCE

See every feature and the pricing on the EU/UK VAT Manager for WooCommerce plugin page.

View plugin →

The **VAT shifted text** option (`alg_wc_eu_vat_advanced_vat_shifted_text` , default *VAT Shifted*) lives on the **Compatibility** sub-tab, alongside the PDF invoice integrations. It sets the reverse-charge wording added to invoices.
