EU/UK VAT Manager: Advanced Settings Reference

References · https://wpfactory.com/docs/eu-vat-advanced-settings-reference/

Advanced settings reference

The Advanced sub-tab of the EU/UK VAT Manager for WooCommerce holds the switches you reach for when troubleshooting hosting, caching or checkout-compatibility problems. Every option here is part of the free version. Find them at **WPFactory > EU VAT** (also reachable at **WooCommerce > Settings > EU VAT**), **Advanced** sub-tab.

Advanced options

Label	Option ID	Default	What it does
Debug	`alg_wc_eu_vat_debug`	No	Writes a validation log to WooCommerce > Status > Logs.
Force VAT recheck on checkout	`alg_wc_eu_vat_force_checkout_recheck`	No	Re-validates the number on every checkout, useful with dynamic caching.
Sitepress optimizer dynamic caching plugin	`alg_wc_eu_vat_sitepress_optimizer_dynamic_caching`	No	Compatibility toggle for that caching plugin.

Manual validation of VAT numbers	`alg_wc_eu_vat_manual_validation_enable`	No	Treats a defined list of numbers as valid.
VAT numbers to pass validation	`alg_wc_eu_vat_manual_validation_vat_numbers`	(empty)	The comma-separated list of manually approved numbers.
Remove country from VAT number in REST API	`alg_wc_eu_vat_remove_country_rest_api_enable`	No	Strips the country prefix from the number returned by the REST API.
Reduce concurrent request to VIES	`alg_wc_eu_vat_reduce_concurrent_request_enable`	No	Helps with the MS_MAX_CONCURRENT_REQ VIES error.
Checkout block field	`alg_wc_eu_vat_enable_checkout_block_field`	No	Registers the VAT field for block-based checkout.
Add script dependency	`alg_wc_eu_vat_checkout_block_field_dependencies`	No	Fixes the "alg_wc_eu_vat_ajax_object is not defined" error.
Autofill company name from VAT ID	`alg_wc_eu_vat_advance_enable_company_name_autofill`	No	Fills the billing company from VIES. Requires the SOAP method.
Force price display including tax	`alg_wc_eu_vat_force_price_display_incl_tax`	No	Shows tax-inclusive prices even for VAT-exempt customers.

Request Identifier

EU/UK VAT MANAGER FOR WOOCOMMERCE

See every feature and the pricing on the EU/UK VAT Manager for WooCommerce plugin page.

View plugin →

A second group on the Advanced sub-tab stores the VIES "request identifier" proof-of-consultation code:

- **Request identifier** (`alg_wc_eu_vat_request_identifier`): fetch and store the identifier code with each validation.
- **Requester country code** (`alg_wc_eu_vat_requester_country_code`) and **Requester VAT number** (`alg_wc_eu_vat_requester_vat_number`): your own VAT details, used as the requesting party in the VIES call.
