Multiple External Products URLs & Currencies: Free vs Pro

Pro Features · https://wpfactory.com/docs/external-products-free-vs-pro/

Multiple External Products URLs & Currencies for WooCommerce free covers store-wide control of external products: one currency for all affiliate products, new tab links for all of them, and extra buy buttons. Pro adds per-product control and a dropdown for extra links. Settings for both are at **WPFactory > Advanced External Products**.

Comparison

Feature	Free	Pro
Currency for all external products	Yes	Yes
Custom currency symbol template	Yes	Yes
Currency per product	No	Yes
Open links in a new tab for all external products (single pages and archives)	Yes	Yes
Open links in a new tab per product (single pages and archives)	No	Yes
Extra product URLs field with custom button text	Yes	Yes
Extra buy buttons on single pages and archives (Buttons template)	Yes	Yes
Dropdown template for extra links, with Default label field	No	Yes

In the free version, the Pro options are visible in the settings but greyed out.

What the Pro features do

Currency per product

Adds a **Currency** field to each external product, so a product sold by a US merchant can show USD while one from a UK merchant shows GBP. See setting a different currency for affiliate products.

New tab per product

Adds **Link in a new tab** and **Link in a new tab on archives** fields to each external product, so only chosen affiliate links open in a new tab. See opening external product links in a new tab.

Dropdown template

Shows the main link and the extra links in one dropdown with a single buy button, on single pages, archives or both. See adding multiple buy links.

Upgrading

1. Install and activate the Pro plugin. The free build detects Pro and stays idle.
2. Your existing settings and product data carry over.
3. Turn on the Pro options you need at **WPFactory > Advanced External Products**.

EXTERNAL PRODUCTS URLS & CURRENCIES

Per-product currency, per-product new tab links and the Dropdown template are Pro features of External Products URLs & Currencies. If you are still on the free version, upgrading unlocks them along with the rest of the Pro toolkit.
