Fix Discount Plugin Conflicts With Quantity Pricing

Troubleshooting · https://wpfactory.com/docs/fix-discount-plugin-conflicts/

Fix conflicts between quantity pricing and other discounts

If quantity discounts from Price by Quantity & Bulk Quantity Discounts for WooCommerce stack with coupons or other discounts, go to WPFactory > Product Price by Quantity and, on the General tab, enable Other cart discounts. The quantity discount is then skipped for any cart that already has a coupon or another discount applied.

Symptoms

- Two discounts apply, so the total is lower than expected.
- The quantity discount is ignored or replaced by another discount.
- Discounts appear to apply in the wrong order.

Cause

Several tools can filter the WooCommerce product price at once. Price by Quantity sets its price through `woocommerce_product_get_price` at the highest priority, so it usually applies last, but another plugin, a coupon, or theme code may still change the final figure.

Fix: stop quantity discounts from stacking

1. Go to **WPFactory > Product Price by Quantity** (also reachable at **WooCommerce > Settings > Product Price by Quantity**).
2. On the **General** tab, enable **Other cart discounts** (`alg_wc_wholesale_pricing_apply_only_if_no_other_discounts`).
3. Save. The quantity discount is now skipped for any cart that already has a coupon or another discount applied, so the two never stack.

Isolate a plugin conflict

1. Note every active plugin that touches pricing, discounts, or coupons.
2. On a staging site, switch to a default theme (such as Storefront) and deactivate everything except WooCommerce and Price by Quantity, then retest.
3. Reactivate the other plugins one at a time to find which one changes the price.

Developer note

Price by Quantity already hooks `woocommerce_product_get_price` and `woocommerce_product_variation_get_price` at `PHP_INT_MAX`, so it runs after most other handlers. If another plugin still wins, adjust that plugin's own price filter priority rather than the WooCommerce core hook, and test on staging.

Still stuck?

Send your WooCommerce system status and a list of active plugins to our team on the Price by Quantity support forum.
