Fix Per-Tag and Per-Product Discount Display Issues

Troubleshooting · https://wpfactory.com/docs/fix-per-product-discounts/

Fix per-tag and per-product quantity rules that do not apply

If a per-tag, per-category or per-product quantity rule in Price by Quantity & Bulk Quantity Discounts for WooCommerce does not apply, enable that level at WPFactory > Product Price by Quantity > General, then configure it where it lives: the product edit meta box, or the category or tag edit screen. Per-category and per-tag levels are Pro.

Symptoms

- A tag or category rule is not applied to matching products.
- A per-product pricing table is missing.

How rules are resolved

Price by Quantity checks for a matching rule in this order: per product, then per category or tag, then the store-wide All Products rule. A level type only takes effect if it is both enabled and has levels configured.

Fix step by step

1. **Enable the level.** Go to **WPFactory > Product Price by Quantity > General**. Per-product is free; **Per product category** (`alg_wc_wholesale_pricing_per_product_cat_enabled`) and **Per product tag** (`alg_wc_wholesale_pricing_per_product_tag_enabled`) are Pro. Turn on the one you need.
2. **Configure the rule where it lives.** Per-product levels are set in the **Product Price by Quantity** meta box on the product edit page. Per-category and per-tag levels are set on the category or tag edit screen, under a Product Price by Quantity section. Set **Number of levels** and click Update so the level fields appear, then fill in Min quantity and Discount.

3. **Watch out for variable products.** When **Per variation** is enabled, the parent variable product does not use the per-product rule; set rules on each variation, or use the store-wide, category, or tag level instead.
4. **Confirm the tag or category is actually assigned.** Edit the product and check that the expected tag or category is attached.
5. **Clear caches** and retest on a simple product first to confirm the rule works.

Still not applying?

Send the product ID, product type, and the rule screenshots to our team on the Price by Quantity support forum.
