The General Settings for WooCommerce Product Tabs

How to · https://wpfactory.com/docs/general-product-tabs/

Configure the General settings for product tabs

The General settings control which parts of Additional Custom Product Tabs for WooCommerce are active. Go to **WPFactory > Product Tabs** (also reachable at **WooCommerce > Settings > Product Tabs**). The page opens on the **General** section. From here you turn the plugin on and switch each feature section on or off.

Options in the General section

Label	Option ID	Default	What it does
Product Tabs (Enable plugin)	`alg_woocommerce_product_tabs_enabled`	Yes	Master switch for the whole plugin. Turn it off and no tabs are changed or added.

Label	Option ID	Default	What it does
Standard Tabs	`alg_wc_product_tabs_standard_tabs_enabled`	Yes	Enables the section that renames, reorders or removes the built-in WooCommerce tabs.
Custom Tabs: All Products	`alg_wc_product_tabs_global_tabs_enabled`	Yes	Enables custom tabs that show on every product.
Custom Tabs: Per Product	`alg_custom_product_tabs_local_enabled`	Yes	Adds the **Custom Product Tabs** meta box to each product edit screen.
Variations Tabs	`alg_wc_product_tabs_variations_tabs_enabled`	No	Adds one tab per variation on variable products. Off by default.

Each of the four section links (Standard Tabs, All Products, Per Product, Variations Tabs) opens that section directly, so you can leave a feature on but jump in to configure it.

Advanced Options

Below the section toggles is one advanced option:

Label	Option ID	Default
HTML paragraph tags	`alg_wc_product_tabs_wpautop`	No

When enabled, this wraps double line breaks in your custom tab content with `<p>` tags, the same way WordPress formats post content. For a full walkthrough see the guide on formatting tab content with HTML paragraph tags.

Use cases

- Turn the whole plugin off temporarily while troubleshooting, without losing any of your tab settings.
- Enable only the sections you use, for example Standard Tabs and All Products, and leave Variations Tabs off.

PRODUCT TABS

The General settings are free. Additional Custom Product Tabs for WooCommerce Pro lets you add unlimited global and per-product custom tabs.
