General Settings Configuration

How to · https://wpfactory.com/docs/general-settings-configuration/

Configure the general PDF Invoicing settings

To configure the general settings of PDF Invoices & Packing Slips Generator for WooCommerce, go to WPFactory > PDF Invoicing (also reachable at WooCommerce > Settings > PDF Invoicing) and open the General section. There you control the master switch, the number of documents, and the advanced PDF engine options. The free version supports one document.

Go to **WPFactory > PDF Invoicing** (also reachable at **WooCommerce > Settings > PDF Invoicing**), then open the **General** section.

Plugin and general options

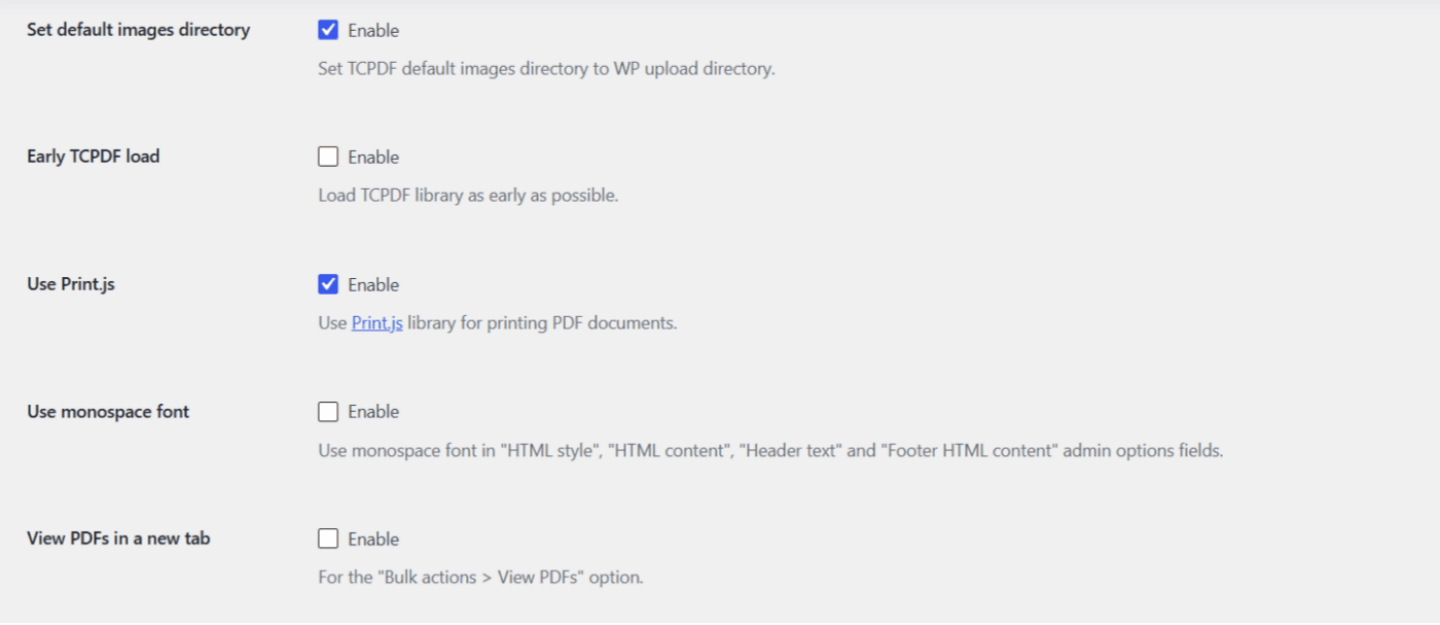

Label	Option ID	Default	What it does

PDF Invoicing (Enable plugin)	`alg_wc_pdf_invoicing_plugin_enabled`	Yes	Master switch for all document generation, columns, actions, and emails.
Total documents	`alg_wc_pdf_invoicing_total_docs`	1	Number of document types to configure. After saving, a new settings section appears for each document. This field is read-only in the free version, which supports one document; raising it above 1 is a Pro feature.

> **Note:** the free version supports a single document. To set **Total documents** above 1 and add a packing slip or credit note, you need PDF Invoicing Pro.

Advanced options

These settings tune the underlying TCPDF engine and a few compatibility features. The defaults are safe for most stores.

Label	Option ID	Default	What it does
