How to Sell Products Individually without Quantity Options

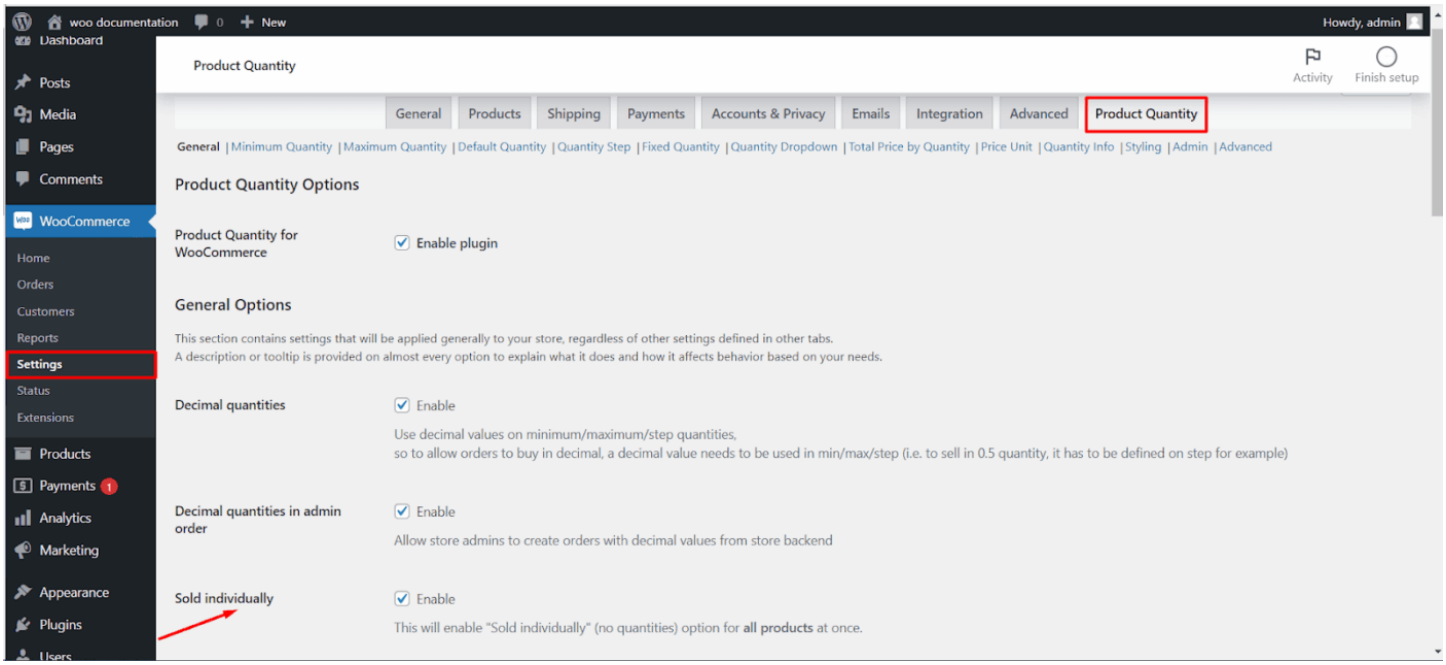

How to · https://wpfactory.com/docs/individual-product-sale/

To sell products individually in WooCommerce, so customers can add only one unit and the quantity box disappears, use the **Sold individually** setting in the Min Max Step Quantity Limits Manager for WooCommerce. This is useful for exclusive items, made-to-order goods, or anything you never sell in multiples.

Steps

1. Go to **WPFactory > Quantity Manager** (also reachable at **WooCommerce > Settings > Product Quantity**).
2. Open the **General** section.
3. Find **Sold individually** and tick **Enable**. This turns on WooCommerce's "Sold individually" behavior for **all products** at once.
4. Click **Save changes**.

Options reference

Label	Option ID	Default	Free/Pro
Sold individually	`wpfmmsq_all_sold_individually_enabled`	No	Free

> **Note:** this switch applies to the whole store. To make only certain products sold individually, use WooCommerce's own per-product "Sold individually" checkbox on the product's **Inventory** tab instead.

Result

On the affected products the quantity input is removed and customers can add a single unit to the cart.

QUANTITY MANAGER

This feature is free. Min Max Step Quantity Limits Manager for WooCommerce Pro adds per-category and per-attribute quantity rules, so you can set limits exactly where you need them. Per-product minimum, maximum and step are free.
