Info and Admin Sections of Payment Gateway Currency

Pro Features · https://wpfactory.com/docs/info-admin-sections-of-payment-gateway-currency/

Info and Admin: showing conversion to shoppers and staff

Within Convert Currency, Payment Gateway Currency for WooCommerce has two display areas: **Info** for the storefront and emails, and **Admin** for the WordPress dashboard. Both apply once conversion is enabled, and both work in the free version for the standard gateways.

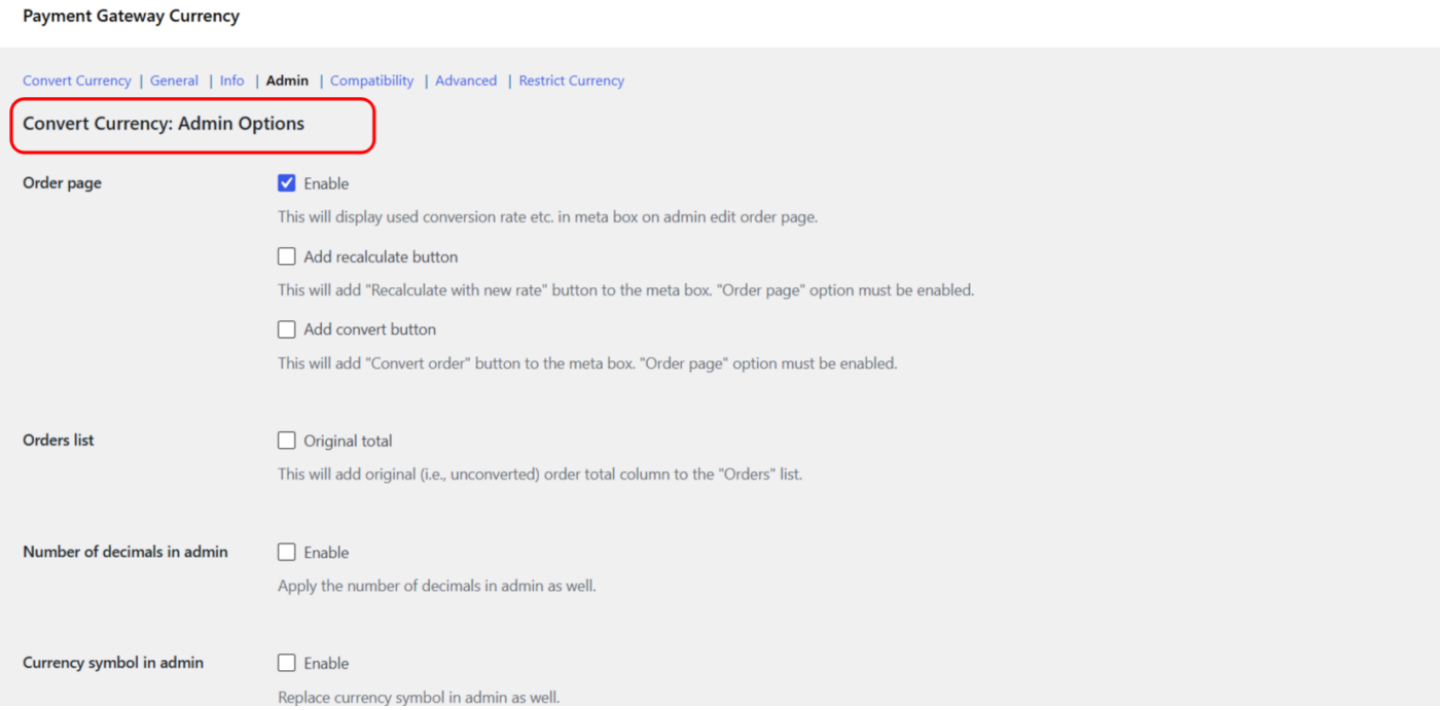

Info (frontend)

- **Frontend info** (`alg_wc_pgbc_convert_currency_show_info` , default `No`): show the used rate and converted or original prices in the cart, checkout, order details, and emails.
- **Positions** (`alg_wc_pgbc_convert_currency_info_hooks`): choose exactly where the info appears.
- **Templates** and **Extra templates**: customize the output per position and per context (Cart or AJAX / mini-cart), using placeholders such as `%price%` , `%unconverted_price%` , `%convert_rate%` , and

`%convert_currency%`.

Full details are in Displaying conversion rates on the frontend.

Admin (backend)

- **Order page** (`alg_wc_pgbc_convert_currency_order_meta_box`, default `Yes`): a meta box on the edit-order screen showing the rate used for that order.
- **Add recalculate button** and **Add convert button** (both default `No`): add "Recalculate with new rate" and "Convert order" actions to that meta box.
- **Orders list: original total** (`alg_wc_pgbc_convert_currency_admin_orders_list_total`, default `No`): add an unconverted-total column to the Orders list.
- **Currency symbol in admin** and **Number of decimals in admin** (both default `No`): apply the gateway's symbol and decimals inside the dashboard too.
- **Order total in admin** (`alg_wc_pgbc_convert_currency_admin_order_total`, default `No`): a custom admin total format, default `%order_total% %currency%`.

> **Free or Pro?** The Info and Admin options themselves are not Pro-gated. The only thing Pro unlocks in this plugin is the ability to configure gateways beyond the five standard ones. See the

full Admin walkthrough in Convert Currency Admin options.

PAYMENT GATEWAY CURRENCY FOR WOOCOMMERCE

Displaying conversion clearly reassures international shoppers. If you need conversion on gateways beyond the standard set, upgrade to Payment Gateway Currency Pro.
