How to Set Up Product Purchase Limits in WooCommerce

How to · https://wpfactory.com/docs/manage-product-limits/

The General section of Maximum Products per User for WooCommerce is where you decide what to count and which orders count toward each customer's limit. Everything in this section is available in the free version.

Where to find it

Go to **WPFactory > Max Products per User** (also reachable at **WooCommerce > Settings > Maximum Products per User**), then open the **General** section.

Core options

Label	Option ID	Default	Free/Pro

Enable plugin	`wpjup_wc_maximum_products_per_user_plugin_enabled`	Yes	Free
Mode (quantities, orders, prices incl. tax, prices excl. tax, weights, volumes)	`alg_wc_mppu_mode`	Product quantities	Free
Order statuses (count toward limit)	`alg_wc_mppu_order_status`	Completed	Free
Order statuses: Delete	`alg_wc_mppu_order_status_delete`	None	Free
Payment gateways	`alg_wc_mppu_payment_gateways`	All	Free
Quantity input (set field max to remaining limit)	`alg_wc_mppu_set_qty_field_max_attr`	No	Free
Add to cart button (disable when limit reached)	`alg_wc_mppu_disable_product_purchase_by_limit`	No	Free
Use variations	`alg_wc_mppu_use_variations`	No	Free
User roles (different limits per role)	`alg_wc_mppu_use_user_roles`	No	Free
Hide products with exceeded limits	`alg_wc_mppu_hide_products`	No	Free
Count by current payment method	`alg_wc_mppu_count_by_current_payment_method`	No	Free

Step by step

1. Confirm **Enable plugin** is on (it is by default).

2. Set **Mode** to whatever you want to cap: product quantities, number of orders, price, weight or volume.
3. In **Order statuses**, choose which statuses mark a sale as counted. If you select several, data updates once, on whichever status change happens first.
4. Optionally restrict counting to specific **Payment gateways**. Leave empty to count all.
5. Set the actual limit values in the **Limits** section (All Products, or Per Product / Per Taxonomy in Pro).
6. Save. If you install on an existing store, run **Recalculate sales data** in the Tools section so past orders are counted.

> **Note:** whenever you change **Mode** or **Order statuses**, re-run **Recalculate sales data** so stored figures match the new setting.

Troubleshooting

- Limits count nothing: the order status your store uses is not in **Order statuses**, or you have not recalculated after install.
- Old orders ignored: run Recalculate sales data once after enabling the plugin.

MAXIMUM PRODUCTS PER USER FOR WOOCOMMERCE

These General options are free. Maximum Products per User for WooCommerce Pro adds per-product, per-category and per-tag limits plus formula-based rules.
