Maximum Products per User: How to Reset a Settings Section

How to · https://wpfactory.com/docs/maximum-products-per-user-reset-settings/

Resetting a settings section to its defaults

Every section of Maximum Products per User for WooCommerce has a built-in reset control, so you can undo a misconfigured General, Limits, Guests, Frontend or other section without touching the rest. This is free.

Where to find it

Go to **WPFactory > Max Products per User** (also reachable at **WooCommerce > Settings > Maximum Products per User**), open the section you want to reset and scroll to the **Reset Settings** box at the bottom.

Step by step

1. Open the section whose options you want to clear.
2. Tick **Reset section settings** (`wpfmppu_<section>_reset`).
3. Click **Save changes**. Every option in that section returns to its default value.

> **Note:** the reset applies only to the section you are viewing, and there is no undo. Note down any custom values you may want back before saving.

When to use it

- You changed several options while testing and want a clean starting point.
- A section behaves unexpectedly and you want to rule out a stray setting.

MAXIMUM PRODUCTS PER USER FOR WOOCOMMERCE

Section resets are free in Maximum Products per User for WooCommerce. Pro adds per-product, per-category and formula limits.
