Setting Minimum/Maximum Amounts by User Role

Getting Started · https://wpfactory.com/docs/minimum-quantities-by-role/

To set WooCommerce order limits by user role, open **WPFactory > Order Min/Max > User Roles** in Order Minimum/Maximum Amount Limits for WooCommerce, tick **Amount by user role**, save, then enter a minimum or maximum sum, quantity or other amount for each role. Role limits are free, including a Guest row.

Step-by-step

1. In the **General** section, check that **Amount types** includes what you want to limit (the default is sum and quantity) and **Amount limits** includes Minimum and/or Maximum.
2. Go to **WPFactory > Order Min/Max** (also reachable at **WooCommerce > Settings > Order Min/Max Amount**) and open the **User Roles** sub-tab.
3. Tick **Amount by user role** (`alg_wc_oma_by_user_role_enabled`).

4. Optionally narrow the list with **Enabled user roles** (`alg_wc_oma_enabled_user_roles`); leave it empty to show fields for every role. Click **Save changes**.
5. Fill in the minimum and maximum amounts for each role and amount type, then save again. Each role gets one field per enabled limit and amount type, such as **Min sum** or **Max quantity**.

Options in this section

Label	Option ID	Default	Free/Pro
Amount by user role (enable section)	`alg_wc_oma_by_user_role_enabled`	No	Free
Get user roles method	`alg_wc_oma_get_user_roles_method`	Editable roles	Free
Enabled user roles	`alg_wc_oma_enabled_user_roles`	(all)	Free
Priority	`alg_wc_oma_by_user_role_priority`	100	Free

Good to know

- An amount of **0** is ignored; a negative value such as **-1** removes the limit for that role.
- Guests are covered by a built-in **Guest** role in the list.
- Custom roles from other plugins are supported. Switch **Get user roles method** to **All roles** if a role is missing from the list.

How the role limit is chosen

- Logged-out visitors use the **Guest** row. Logged-in customers are matched by their WordPress roles, in the order the roles are stored on the account; the first role with a non-zero amount is used.
- If the role has no amount (0), the General amount applies.
- Role amounts have **Priority** 100, so Users (20), Shipping (30), Payment Gateways (40) and Memberships (50) amounts are checked first when those Pro sections are on. Lower the role priority to put roles ahead of them.

Example: wholesale minimum

Set the General **Min sum** to 0 and your wholesale role's **Min sum** to 500. Retail customers and guests can order any amount, while wholesale buyers see the minimum message in the cart and cannot check out below 500 (with **Block checkout process** on, its default).

If it does not work

- The role is not in the list. Switch **Get user roles method** to **All roles**, or add the role to **Enabled user roles**.
- The quantity or weight fields are missing. Add that type to **Amount types** in the General section.
- You are testing while logged in as an administrator. Test with an account that has only the target role, or log out to test Guest.
- A higher-priority section (for example a Users amount) already set a limit for that customer.

FAQ

Can I set a minimum quantity by user role?

Yes. Add **Quantity** to **Amount types** in the General section (it is enabled by default), then fill in **Min quantity** for the role. This is free.

Can I combine user roles with product or category limits?

Yes, in Pro. The Products section's per-product, category and tag limits include a field for each enabled role. See amounts by product, category, or tag.

Can one customer get their own limit?

Yes, with the Pro Users section. See amounts per user.

If role limits are not applied, see role, product or category rules not honored.

ORDER MIN/MAX AMOUNT

User-role limits are free. Order Minimum/Maximum Amount Limits for WooCommerce Pro adds limits for individual users, products, categories, shipping methods, gateways, currencies, and more.
