Offers REST API Reference

Developers · https://wpfactory.com/docs/name-your-price-rest-api/

Offers REST API

Name Your Price: Make Your Own Offer for WooCommerce can expose price offers over the WooCommerce REST API so external systems can list, read, and update them. The REST API is free.

Enable the REST API

Go to **WPFactory > Price Offers** (also reachable at **WooCommerce > Settings > Price Offers**), open the **Advanced** section, and enable **REST API** (`alg_wc_po_rest_api_enabled`, default off). The routes register under the WooCommerce `wc/v3` namespace, so they use standard WooCommerce REST API authentication (consumer key and secret).

Routes

Method	Route	Purpose
`GET`	`/wp-json/wc/v3/alg_wc_price_offers`	List all offers
`GET`	`/wp-json/wc/v3/alg_wc_price_offers/<id>`	Retrieve a single offer
`PUT`	`/wp-json/wc/v3/alg_wc_price_offers/<id>`	Update an offer

Example: list offers

```
curl https://example.com/wp-json/wc/v3/alg_wc_price_offers \
  -u consumer_key:consumer_secret
```

Example: retrieve one offer

```
curl https://example.com/wp-json/wc/v3/alg_wc_price_offers/123 \
  -u consumer_key:consumer_secret
```

Notes

- Offers are stored as a custom post type (`alg_wc_price_offer`) with statuses such as Open, Rejected, Accepted, Counter, Cancelled, and Completed.
- Because the routes live in the `wc/v3` namespace, the same keys and permissions you use for other WooCommerce REST calls apply here.
- The REST controller only loads while the **REST API** option is enabled.
