Notice Options

How to · https://wpfactory.com/docs/notice-options/

URL Coupons notice options

The notice options of Coupons & Add to Cart by URL Links for WooCommerce control the message a customer sees when a coupon is applied through a link. One option, **Delay notice**, is free; the rest of this sub-tab is Pro.

Go to **WPFactory > Coupons by URL** (also reachable at **WooCommerce > Settings > URL Coupons**) and open the **Notices** sub-tab.

Delay notice (Free)

Postpones the "Coupon code applied successfully" message when a customer opens a coupon link with an empty cart. The message appears once they add at least one product, which avoids showing

a success notice on a cart that has nothing in it.

Custom notice and per-coupon notices (Pro)

- **Custom notice:** one message shown for all URL coupons, in place of the default one.
- **Notice per coupon:** adds a **URL Coupons: Notice** field to each coupon so a single coupon can carry its own message.
- **Override global notice:** when a coupon has a per-coupon notice, remove the global custom notice so only the per-coupon message shows.
- **Override default notice:** remove WooCommerce's default "Coupon code applied successfully" message when you have a custom one to show.

Notice method, type, and glue (Pro)

- **Notice method > Add** (default): show your custom notice as a separate notice. Its style is set by **Notice type** (Success, Error, or Notice). **Notice type** only applies when the method is **Add**.
- **Notice method > Append:** merge your custom notice into the existing coupon message, joined by **Notice glue** (a line break by default). **Notice glue** only applies when the method is **Append**.

Options reference

Label	Option ID	Default	Free/Pro
Delay notice	`alg_wc_url_coupons_delay_notice`	No	Free
Custom notice	`alg_wc_url_coupons_notice`	(empty)	Pro
Notice per coupon	`alg_wc_url_coupons_notice_per_coupon`	No	Pro
Override global notice	`alg_wc_url_coupons_notice_per_coupon_override`	No	Pro
Override default notice	`alg_wc_url_coupons_notice_remove_default`	No	Pro
Notice method	`alg_wc_url_coupons_notice_method`	Add	Pro
Notice type	`alg_wc_url_coupons_notice_type`	Success	Pro
Notice glue	`alg_wc_url_coupons_notice_glue`	` `	Pro

Each sub-tab also has a **Reset section settings** checkbox to return that section to its defaults. For a full walkthrough of the per-coupon notice, see the guide on showing a custom notice per coupon.

URL COUPONS

Delay notice is free. Custom and per-coupon notices are part of URL Coupons Pro, which also adds redirects and add-to-cart coupons.
