Full Options Reference

This page lists every setting in Payment Gateway Currency for WooCommerce with its option ID, default, and Free or Pro status, grouped by the sub-tab and section it appears in. All settings live under **WPFactory > Payment Gateway Currency** (also reachable at **WooCommerce > Settings > Payment Gateway Currency**).

Almost every option here is free. The single Pro gate is which payment gateways you can configure: the per-gateway fields in the Convert Currency and Restrict Currency sections work in the free version for the five standard gateways (Direct bank transfer, Check payments, Cash on delivery, PayPal, WooCommerce PayPal Payments) and are unlocked for all gateways in Pro.

Restrict Currency

Label	Option ID	Default	Free/Pro

Restrict currency (Enable section)	`alg_wc_payment_gateways_by_currency_plugin_enabled`	No	Free
Allowed currencies (per gateway)	`alg_wc_payment_gateways_by_currency_incl[{gateway}]`	(empty, ignored)	Free (5 gateways) / Pro (all)
Denied currencies (per gateway)	`alg_wc_payment_gateways_by_currency_excl[{gateway}]`	(empty, ignored)	Free (5 gateways) / Pro (all)

The Restrict Currency section keeps the plugin's original option keys, which is why they start with `alg_wc_payment_gateways_by_currency_` rather than the `alg_wc_pgbc_` prefix used everywhere else. Both are the current, shipping keys.

PAYMENT GATEWAY CURRENCY FOR WOOCOMMERCE

Every option above is free except the per-gateway fields, which cover the five standard gateways in Free and all gateways in Pro. Unlock the full gateway set with Payment Gateway Currency for WooCommerce Pro.
