Order and Order Item Export Fields, Free and Pro

Pro Features · https://wpfactory.com/docs/order-and-order-items/

Export Products, Orders & Customers for WooCommerce gives you two order-related tools: Export Orders (one row per order) and Export Orders Items (one row per line item). Almost every field is free; this article shows what each tool offers and marks the Pro additions.

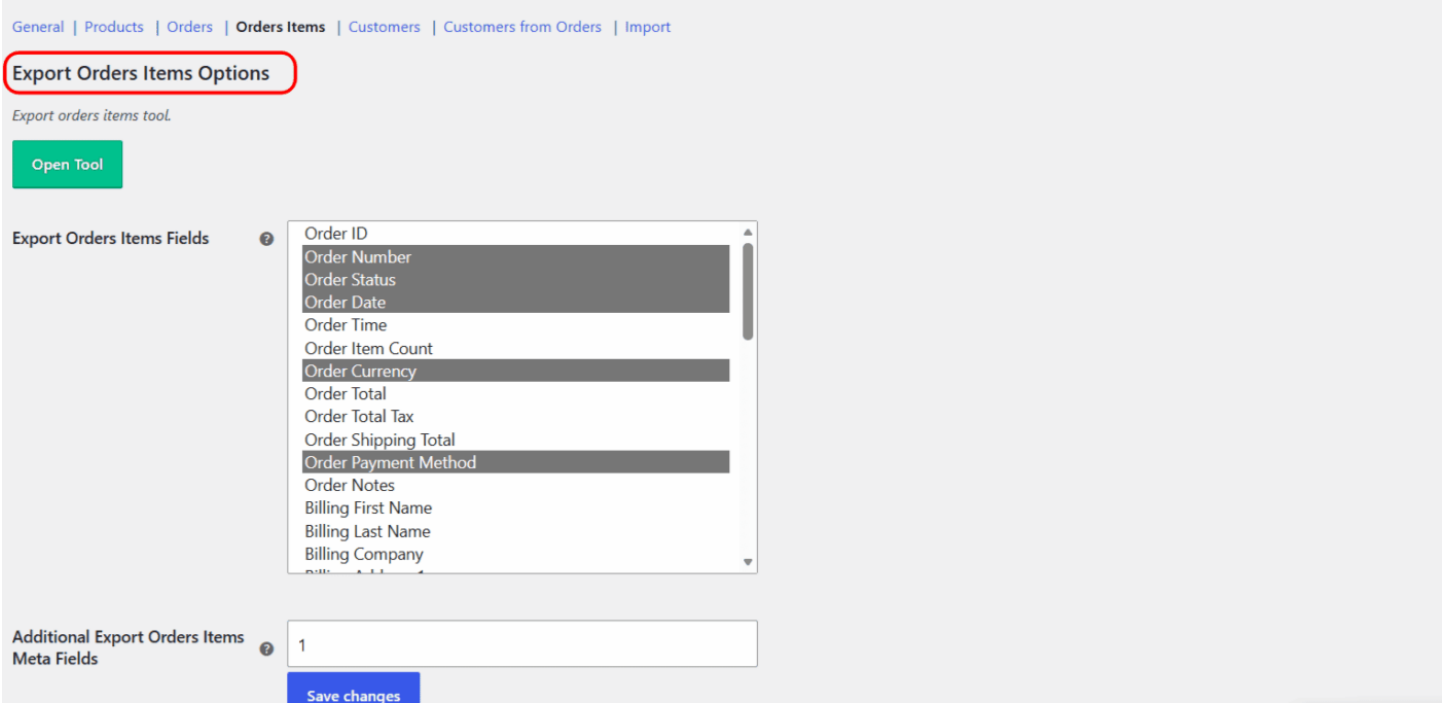

Export Orders fields (all free)

- **Order basics:** Order ID, Order Number, Status, Date, Time, Item Count.
- **Contents and money:** Order Items, Order Product Input Fields, Currency, Total, Total Tax, Shipping Total, Payment Method, Shipping Method.
- **Notes:** Order Notes.
- **People:** Customer ID, plus the full billing and shipping address set (name, company, address, city, state, postcode, country, phone, email).

> **Pro field: Backend Order Notes** (internal notes your team adds to an order) is available only with Export WooCommerce Pro.

Export Orders Items fields (all free)

- **Order context** (repeated per item): Order ID, Number, Status, Date, Time, Item Count, Currency, Total, Total Tax, Shipping Total, Payment Method, Order Notes, and billing and shipping details.
- **Item details:** Item Id, Item Name, Item SKU, Item Product Input Fields, Item Meta, Item Variation Meta, Item Quantity, Item Tax Class, Item Product ID, Item Variation ID.
- **Item money:** Item Line Subtotal, Item Line Total, Item Line Subtotal Tax, Item Line Tax, Item Line Subtotal Plus Tax, Item Line Total Plus Tax.

Backend Order Notes is a Pro field here too.

Custom order and item meta fields

Both tools have an "Additional ... Meta Fields" control to add columns from meta keys. On Order Items each field also has a **Type** (Order Meta or Product Meta). The free version allows one such field per report; Pro removes the limit.

Where to run these exports

Set your fields under **WPFactory > Export** (also reachable at **WooCommerce > Settings > Export**), then click **Open Tool** to run the export from the dashboard at **WooCommerce > Export**.

EXPORT WOOCOMMERCE

The order and order item exports are free. Export WooCommerce Pro adds the Backend Order Notes field and unlimited custom meta columns.
