# Order and Order Item Export Fields Reference

References · https://wpfactory.com/docs/order-export-fields-reference/

This reference lists every field available in the Orders and Orders Items sections of Export Products, Orders & Customers for WooCommerce, with each field's ID. All fields are free except where marked Pro.

Select fields under **WPFactory > Export** (also reachable at **WooCommerce > Settings > Export**).

## Export Orders fields

| Field | Field ID | Free/Pro |
|---|---|---|
| Order ID | `order-id` | Free |
| Order Number | `order-number` | Free |
| Order Status | `order-status` | Free |

| Shipping fields (first/last name, company, address 1 and 2, city, state, postcode, country) | `shipping-first-name` ... `shipping-country` | Free |
| Backend Order Notes | `backend-order-notes` | Pro |

## Export Orders Items fields

Each row is a single line item. The order-level fields repeat on every item row for context.

| Field | Field ID | Free/Pro |
|---|---|---|
| Order context (ID, Number, Status, Date, Time, Item Count, Currency, Total, Total Tax, Shipping Total, Payment Method, Order Notes, billing and shipping fields) | `order-id` ... `shipping-country` | Free |
| Item Id | `item-id` | Free |
| Item Name | `item-name` | Free |
| Item SKU | `item-sku` | Free |
| Item Product Input Fields | `item-product-input-fields` | Free |

| Field | Field ID | Free/Pro |
|---|---|---|
| Item Meta | `item-meta` | Free |
| Item Variation Meta | `item-variation-meta` | Free |
| Item Quantity | `item-qty` | Free |
| Item Tax Class | `item-tax-class` | Free |
| Item Product ID | `item-product-id` | Free |
| Item Variation ID | `item-variation-id` | Free |
| Item Line Subtotal | `item-line-subtotal` | Free |
| Item Line Total | `item-line-total` | Free |
| Item Line Subtotal Tax | `item-line-subtotal-tax` | Free |
| Item Line Tax | `item-line-tax` | Free |
| Item Line Subtotal Plus Tax | `item-line-subtotal-plus-tax` | Free |
| Item Line Total Plus Tax | `item-line-total-plus-tax` | Free |
| Backend Order Notes | `backend-order-notes` | Pro |

**Tip:** to include data not in these lists, add a custom column with the additional meta fields (see the meta-field how-to). On Order Items, each meta column can read from order meta or product meta.

EXPORT WOOCOMMERCE

All standard order and item fields are free. Export Products, Orders & Customers for WooCommerce Pro adds the Backend Order Notes field and unlimited custom meta columns.
