How to Set Payment Gateways per Product in WooCommerce: Installation

Getting Started · https://wpfactory.com/docs/payment-gateways-products/

Install and set up Payment Gateways per Products

To show or hide WooCommerce payment methods based on what is in the cart, install Payment Methods by Product & Country for WooCommerce. Once active, the plugin lets you control which gateways appear for each product category, product tag, individual product, or billing country. This guide covers installation and the first configuration.

Install the plugin

1. Log in to your WordPress dashboard.
2. Go to **Plugins > Add New**.
3. Search for **Payment Gateways per Products**.
4. Click **Install Now** on the plugin by WPFactory, then click **Activate**.

To upload manually, download the ZIP, go to **Plugins > Add New > Upload Plugin**, choose the file, click **Install Now**, then **Activate**.

Open the settings

Go to **WPFactory > Payment Gateways per Products** (also reachable at **WooCommerce > Settings > Payment Gateways per Products**). On activation the plugin changes nothing until you set your first rule, so no gateways are hidden by default.

Set your first rule

1. Open the **Product Categories** or **Product Tags** tab (both are available in the free version and enabled by default).
2. Find the payment gateway you want to control. Each gateway has an **Include** field and an **Exclude** field.
3. Add a category (or tag) to **Include** to show that gateway only when a matching product is in the cart, or to **Exclude** to hide that gateway when a matching product is in the cart.
4. Click **Save changes**.

> **Note:** There is no master on/off switch for the plugin. Each section has its own **Enable section** checkbox. The Product Categories and Product Tags sections are on by default; the Products and Countries sections are part of Pro.

What is free and what is Pro

Feature	Free/Pro
Rules by product category	Free
Rules by product tag	Free
Rules by individual product and variation	Pro
Rules by billing country	Pro
Fallback gateway for conflicting carts	Pro

PAYMENT GATEWAYS PER PRODUCTS

Category and tag rules are free. Payment Methods by Product & Country for WooCommerce Pro adds per-product, per-variation and per-country rules plus a fallback gateway.
