Payment Methods by Location Settings Reference

References · https://wpfactory.com/docs/payments-by-location-settings-reference/

This reference lists every setting in Conditional Payment Methods by Location for WooCommerce, with its label, option ID, default and Free/Pro status. Settings are at **WPFactory > Payment Gateways by Customer Location** (also reachable at **WooCommerce > Settings > Payment Gateways by Customer Location**) in five sections.

General section

Label	Option ID	Default	Free/Pro
Detect country by (Billing country, Shipping country, Country by IP)	`alg_wc_gateways_by_location_country_type`	Billing country	Free
Detect state by (Billing state, Shipping state)	`alg_wc_gateways_by_location_state_type`	Billing state	Free
Detect city by (Billing city, Shipping city)	`alg_wc_gateways_by_location_cities_type`	Billing city	Free
Detect postcode by (Billing postcode, Shipping postcode)	`alg_wc_gateways_by_location_postcodes_type`	Billing postcode	Free

Label	Option ID	Default	Free/Pro
Advanced Options: Force JavaScript checkout update (Billing/Shipping state, city, postcode)	`alg_wc_gateways_by_location_force_js_checkout_update`	None selected	Free

Location sections

Each location section has an on/off switch plus an Include and an Exclude field for every payment gateway, listed by the gateway's admin name. Per-gateway values are stored in one option per field, keyed by gateway ID, for example `alg_wc_gateways_by_location_country_include[cod]`.

Section	Label	Option ID	Default	Free/Pro
Countries	Gateways by country: Enable section	`alg_wc_gateways_by_location_country_section_enabled`	Yes	Free
Countries	Include countries / Exclude countries (multiselect, includes European Union and Netherlands Antilles)	`alg_wc_gateways_by_location_country_include`, `alg_wc_gateways_by_location_country_exclude`	Empty	Free
States	Gateways by state: Enable section	`alg_wc_gateways_by_location_state_section_enabled`	Yes	Free

Section	Label	Option ID	Default	Free/Pro
States	Include states / Exclude states (multiselect, base country states only)	`alg_wc_gateways_by_location_state_include`, `alg_wc_gateways_by_location_state_exclude`	Empty	Free
Cities	Gateways by city: Enable section	`alg_wc_gateways_by_location_city_section_enabled`	Yes	Free
Cities	Include cities / Exclude cities (text area, one city per line)	`alg_wc_gateways_by_location_city_include`, `alg_wc_gateways_by_location_city_exclude`	Empty	Free
Postcodes	Gateways by postcode: Enable section	`alg_wc_gateways_by_location_postcode_section_enabled`	Yes	Free

Section	Label	Option ID	Default	Free/Pro
Postcodes	Include postcodes / Exclude postcodes (text area, one per line, wildcards and numeric ranges)	`alg_wc_gateways_by_location_postcode_include`, `alg_wc_gateways_by_location_postcode_exclude`	Empty	Free
Every section	Reset Settings: Reset section settings	`alg_wc_gateways_by_location_{section}_reset`	No	Free

An empty Include or Exclude field is ignored. Turning a section off with **Enable section** skips that location type entirely, even if values are saved.

Free and Pro

In version 1.8.0 the free and Pro builds contain the same settings, and the free version works with any payment gateway. Every setting above is available in both.
